SERVICE MANUAL

DLP PROJECTOR

***TDP-T80, TDP-T90,
TDP-T91, TDP-TW90
TDP-S80, TDP-S81,
TDP-SW80
TDP-MT200***

Preface

This manual is applied to T80/T90/T91/TW90/MT200 / S80 / S81 / SW80 DMD Projector with digital imaging functionality based on Digital Micro-mirror Device (DMD) technology. It's the mode of single Panel, 200 watt Lamp. The manual gives you a brief description of basic technical information to help in service and maintaining the product.

Your customers will appreciate the quick response time when you immediately identify problems that occur with our products. We expect your customers will appreciate the service that you offer them.

This manual is for technicians and people who have an electronic background. Send the product back to the distributor for repairing and do not attempt to do anything that is complex or is not mentioned in the troubleshooting.

NOTICE :

The information found in this manual is subject to change without prior notice. Any subsequent changes made to the data herein will be incorporated in further edition.

Introduction

1-1 Product Highlights

Item	Description	T80	T90	T91	TW90	MT200	S80	S81	SW80
1	One panel 0.7 XGA / 12° DDR DMD projection system	V	V	V	V				
	One panel 0.55" WVGA / 12° DDR DMD projection system					V	V	V	V
2	200 Watt compact P-VIP Lamp (user replaceable, Lamp is driven by 200 Watt lamp driver)	V	V	V	V		V	V	V
	Phoenix X66 200W SHP Lamp (user replaceable)					V			
3	High efficiency cooling system with low system acoustic noise level (35 dB(A) in 160W eco-mode)	V	V	V	V	V			
	High efficiency cooling system with low system acoustic noise level (35 dB(A) in 150W eco-mode)						V	V	V
4	Light weight Approx. 2.8Kgs.	V	V	V	V	V	V	V	V
5	Manual focus projection, 1:1.2 mechanical zoom lens	V	V	V	V	V	V	V	V
6	True 1024 x 768 resolution, 16.7M True colors	V	V	V	V				
	True 854 x 480 resolution, 16.7M True colors					V			
	True 800 x 600 resolution, 16.7M True colors						V	V	V
7	With up, down, left, and right screen reverse	V	V	V	V	V	V	V	V
8	Build-in full screen NTSC / PAL / SECAM video capability with S-video / Composite / component through D-sub	V	V	V	V	V	V	V	V
9	SXGA / XGA / SVGA / VGA / MAC compatibility with two D-Sub 15 pin VGA connector input terminal	V	V	V	V	V	V	V	V
10	Auto image re-sizing to 1024 x 768 full screen	V	V	V	V				
	Auto image re-sizing to 854 x 480 full screen					V			
	Auto image re-sizing to 800 x 600 full screen						V	V	V
11	Auto detection of computer signal input	V	V	V	V	V	V	V	V
12	Auto Image synchronization (Auto-tracking / frequency / position adjustment) by Auto-setting key.	V	V	V	V	V	V	V	V
13	Freeze function.	V	V	V	V	V	V	V	V
14	Automatically saves adjustments for future use	V	V	V	V	V	V	V	V
15	IR remote control function	V	V	V	V	V	V	V	V
16	Adaptive voltage control fan speed	V	V	V	V	V	V	V	V
17	Auto & Manual Digital Vertical Keystone Correction	V	V	V	V	V	V	V	V
18	Built-in one 1W speaker	V	V	V	V	V			
	Built-in one 2W speaker						V	V	V
19	Camera			V				V	
20	Wireless				V				V

1-2 Mechanical Specifications

Item	Specification	Description	T80	T90	T91	TW90	MT200	S80	S81	SW80
1	Dimensions (WxHxD)	298x267x100.5 mm (main body)	V	V	V	V	V	V	V	V
2	Weight	Approx. 6.3 lbs. (2.86kg)	V	V	V	V	V	V	V	V
3	Cooling System	<ul style="list-style-type: none"> - Advanced air flow - Two fans with low system acoustic noise level - Temperature control circuits with adaptive voltage control fan speed - Maximum touch temperature follows UL 60950 regulation 	V	V	V	V	V	V	V	V
4	Tilt Angle	6.8 degree with elevator mechanism	V	V	V	V	V	V	V	V
5	Keystone correction	+/-16 degree Vertical	V	V	V	V	V	V	V	V
6	Lamp Door Protection	Lamp power supply shut off automatically when door open	V	V	V	V	V	V	V	V

1-3 Display Panel Specifications

Item	Specification	Description	T80	T90	T91	TW90	MT200	S80	S81	SW80
1	Type	DMD (0.7 12 degree DDR XGA Digital Mirror Device)	V	V	V	V				
		DMD (0.55" 12 degree DDR WVGA Digital Mirror Device)					V	V	V	V
2	Number of active dots	1024(H) x 768 (V)	V	V	V	V				
		854(H) x 480(V)					V			
		800(H) x 600(V)						V	V	V

1-4 Electrical Specifications

Item	Specification	Description	T80	T90	T91	TW90	MT200	S80	S81	SW80
1	Power Supply	<ul style="list-style-type: none"> - Input AC 100-240V~, 3A, 50-60 Hz with PFC - Variance FAN speed control (Depend on temperature variant) 	V	V	V	V	V	V	V	V
2	Terminals	<ul style="list-style-type: none"> - Computer Input (VGA) - Composite Video Input (x 1) - S-Video Input (Standard x 1) 	V	V	V	V	V	V	V	V
3-1	Terminals & I/O connector	<ul style="list-style-type: none"> - Computer Analog Input (VGA x 1) - Component Video Input (RCAx 3) - S Video Input (Mini-Din 4-Pin x 1) - Composite Video Input (RCA x 1) - RS232 (Mini-Din 8pin x 1) 	V	V	V	V	V	V	V	V
3-2	Terminals & I/O connector	- Digital Video with HDCP Input (DVI-D)					V			

Item	Specification	Description	T80	T90	T91	TW90	MT200	S80	S81	SW80
4	Input signal spec.	<ul style="list-style-type: none"> - Hsync Frequency 15~100 kHz - Vsync Frequency 43~85 Hz - Video Signal RGB (PC) <ul style="list-style-type: none"> 1.) Analog RGB : 0.7 Vp-p, 75 ohm 2.) Analog RGB : 1Vp-p, 75 ohm 3.) Sync. Signal <ul style="list-style-type: none"> Separate Sync : (HV) TTL level (bi-polarity) Composite Sync : TTL level (bi-polarity) Sync-on-green : negative sync. 0.3Vp-p - Video <ul style="list-style-type: none"> 1.) Composite video : 1Vp-p, 75 ohm 2.) S-video Luminance : 0.714Vp-p, 75 ohm 3.) Chrominance : 0.286Vp-p, 75 ohm 	V	V	V	V	V	V	V	V
5	Video Compatibility	<ul style="list-style-type: none"> - Standards : <ul style="list-style-type: none"> NTSC : M(3.58 MHz), 4.43 MHz PAL : B, D, G, H, I, M, N SECAM : B, D, G, K, K1, L HDTV : 480i / 576i ; 480p / 576p ; 720p ; 1080i 	V	V	V	V	V	V	V	V
6	XGA / Compression	By using DDP2000 Chips to compress SXGA image into XGA display	V	V	V	V		V	V	V
	SVGA / Compression	By using "DDP2000" Chips to compress SXGA image into WVGA display					V			

1-5 Optical Specifications

Item	Specification	Description	T80	T90	T91	TW90	MT200	S80	S81	SW80
1	Projection lens	F#2.4-2.65 @ 2.4m, f=28.04~35.59mm @ 2.4m. 1.2X Manual Zoom Lens.	V	V	V	V	V			
		F#2.4-2.81 @ 2.4m, f=22.34~26.59mm @ 2.4m. 1.2X Manual Zoom Lens.						V	V	V
2	Projection Image Size	Adjustable from 24.6" to 246" (Diagonal)	V	V	V	V	V	V	V	V
3	Throw Distance	1.2m~10m	V	V	V	V	V	V	V	V
4	Throw Ratio	2.0~2.4 ; 100" / 4.06m ~ 4.88m	V	V	V	V	V	V	V	V
5	Brightness	1850(Typical) ; 1600 (Minimum)	V	V	V	V		V	V	V
		650(Typical) ; 510 (Minimum)					V			
6	Contrast	Full on / off 1600:1 (Typical) 1000 : 1 (Minimum) JBMA 1600 : 1 (Typical) 1000 : 1 (Minimum)	V	V	V	V		V	V	V
		Full on / off 2500:1 (Typical) 1500 : 1 (Minimum)					V			
7	Uniformity	JBMA 75% (Typical) 60% (Minimum)	V	V	V	V		V	V	V
		JBMA 80% (Typical) 65% (Minimum)					V			
8	Lamp	OSRAM E17.5 200W P-VIP Lamp	V	V	V	V				
		Phoenix X66 200W SHP Lamp					V			
		Philips E19 200W UHP Lamp						V	V	V

1-6 Environmental Specifications

Item	Specification	Description	T80	T90	T91	TW90	MT200	S80	S81	SW80
1	Temperature	Operating : 0~35°C, 80% humidity, non-condensing Storage : -20~60°C, 80% humidity, non-condensing	V	V	V	V	V	V	V	V
2	Maximum Humidity	Operating : 0~35°C, 80%RH (Max.), non-condensing Storage : -20~60°C, 80%RH (Max.), non-condensing	V	V	V	V	V	V	V	V
3	Acoustic noise level	39 dB(A) (in 216W mode, at 23+/- 2°C) 35 dB(A) (in 160W eco mode, at 23 +/- 2°C) while color wheel are running with 7200 rpm	V	V	V	V				
		38 dB(A) (in 200W mode, at 23+/- 2°C) 35 dB(A) (in 160W eco mode, at 23 +/- 2°C) while color wheel are running with 7200 rpm					V			
		39 dB(A) (in 200W mode, at 23+/- 2°C) 35 dB(A) (in 150W eco mode, at 23 +/- 2°C) while color wheel are running with 7200 rpm						V	V	V
4	Altitude	Operating : 0°C~35°C for height : 0~2,500 ft 0°C~30°C for height : 2,500~5,000 ft 0°C~30°C for height : 5,000~10,000 ft fan speed adjusted by OSD menu Storage : 0~40,000 ft	V	V	V	V	V	V	V	V
5	MTBF	Operating more than 10,000 hours	V	V	V	V	V	V	V	V
6	Reliability Test	12,000 hours	V	V	V	V	V	V	V	V

1-7 Firmware

Item	Description	T80	T90	T91	TW90	MT200	S80	S81	SW80
1	Firmware A	V							
2	Firmware B		V	V	V				
3	Firmware C					V			
4	Firmware D						V	V	V

Disassembly Procedure

Tool Needed

2-1 Removing Lamp Module

1. Loosen one screw to remove Lamp Cover, and then loosen 2 screws to remove Lamp Module.

2-2 Removing Front Cover, Option Cover and Rear Cover Module

1. Unscrew 4 screws to remove Front Cover.

Ball-endhex-key 2mm

Front Cover

2. Loosen 2 screws to remove Option Cover.

Screw Bit (+) : 107

Option Cover (Blank) PC + ABS - CAOLA

3. Unscrew 6 hex screws and 2 screws to remove Rear Cover Module.

Screw Bit (+) : 102

Rear Cover Module

2-3 Removing Top Cover, Keypad Board, Speaker and Select Button Module

1. Press A point first and then press B point to separate Top Cover and Main Body carefully.

2. Unplug FFC cable to remove Top Cover.

3. Unscrew 6 screws to remove Keypad Board, Speaker and Select Button Module.

2-4 Removing Main Board, LVPS Module, Lamp Driver Module and Fan Module

1. Unplug all cables from Main Board and Unscrew 5 screws to remove Main Board.

Screw Bit (+) : 107

2. Tear off Mylar and then unscrew 5 screws to remove LVPS Module.

Screw Bit (+) : 107

3. Unscrew 3 screws to remove Lamp Driver Module.

4. Unscrew 2 screws to remove Fan Module.

Note : TW90-Add one cable to link wireless function from Main Board of TW90. (As the picture display)

2-5 Removing Interrupter Switch, Engine Module, Fan Module and DMD Board

1. Unscrew 2 screws to remove Interrupter Switch.

Screw Bit (+) : 102

Interrupter Switch

2. Tear off Deflector Tinplate and then unscrew 5 screws to remove Brackets.

Screw Bit (+) : 102

3. Unscrew 6 screws of the red rectangle area and then remove Engine Module.

Engine Module

Screw Bit (+) : 107

4. Remove Fan Module.

5. Unscrew 4 screws to remove Heat Sink.

Screw Bit (+) : 107

Heat Sink

6. Unscrew 4 hex screws to remove DMD Board.

Hex Sleeves 8mm

2-6 Removing DMD Chip, Color Wheel and Photo Sensor Board

1. Remove DMD Chip from Engine Module.

2. Unscrew one screw to remove Color Wheel and Photo Sensor Board.

3. Unscrew 3 screws to remove Zoom Ring and Focus Ring from Engine Module.

2-7 Removing Thermal Board, IR Sensor Board and Fan Duct

1. Unscrew one screw to remove Thermal Sensor Board.

2. Turn over Bottom Cover Module and then unscrew one screw to remove IR Sensor Board.

3. Unscrew one screw to remove Fan Duct from Bottom Module.

2-8 Removing Wireless Board (For TW90 Only)

1. Unscrew 2 screws to remove Option Cover.

Option Cover

2. Pull out the Wireless Board.

Troubleshooting

3-1 Equipment Needed

- T80 / T90 / T91 / TW90 / MT200 / S80 / S81 / SW80 Projector
- PC (Personal Computer)
- CD Player, DVD Player
- VGA to VGA Cable
- Chroma

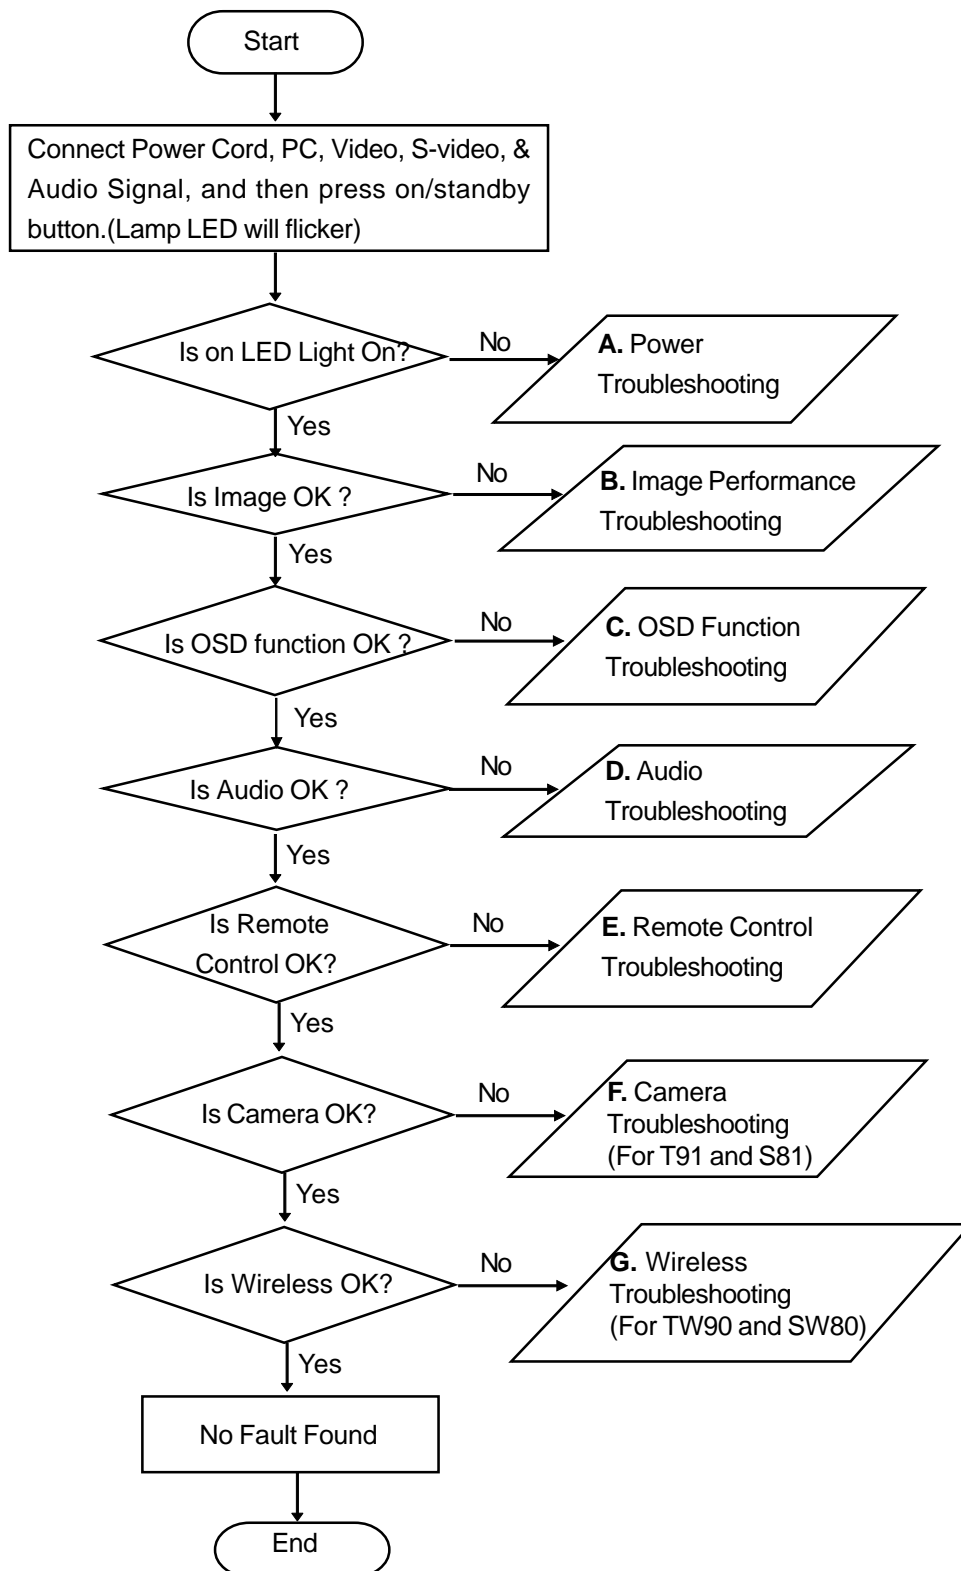

After changing parts, check the below information.

For example : Change the M/B, then check the Version Update, Color Wheel Delay, RGB Level, Frequency, Phase, Reset Lamp Use Time and Reset All.

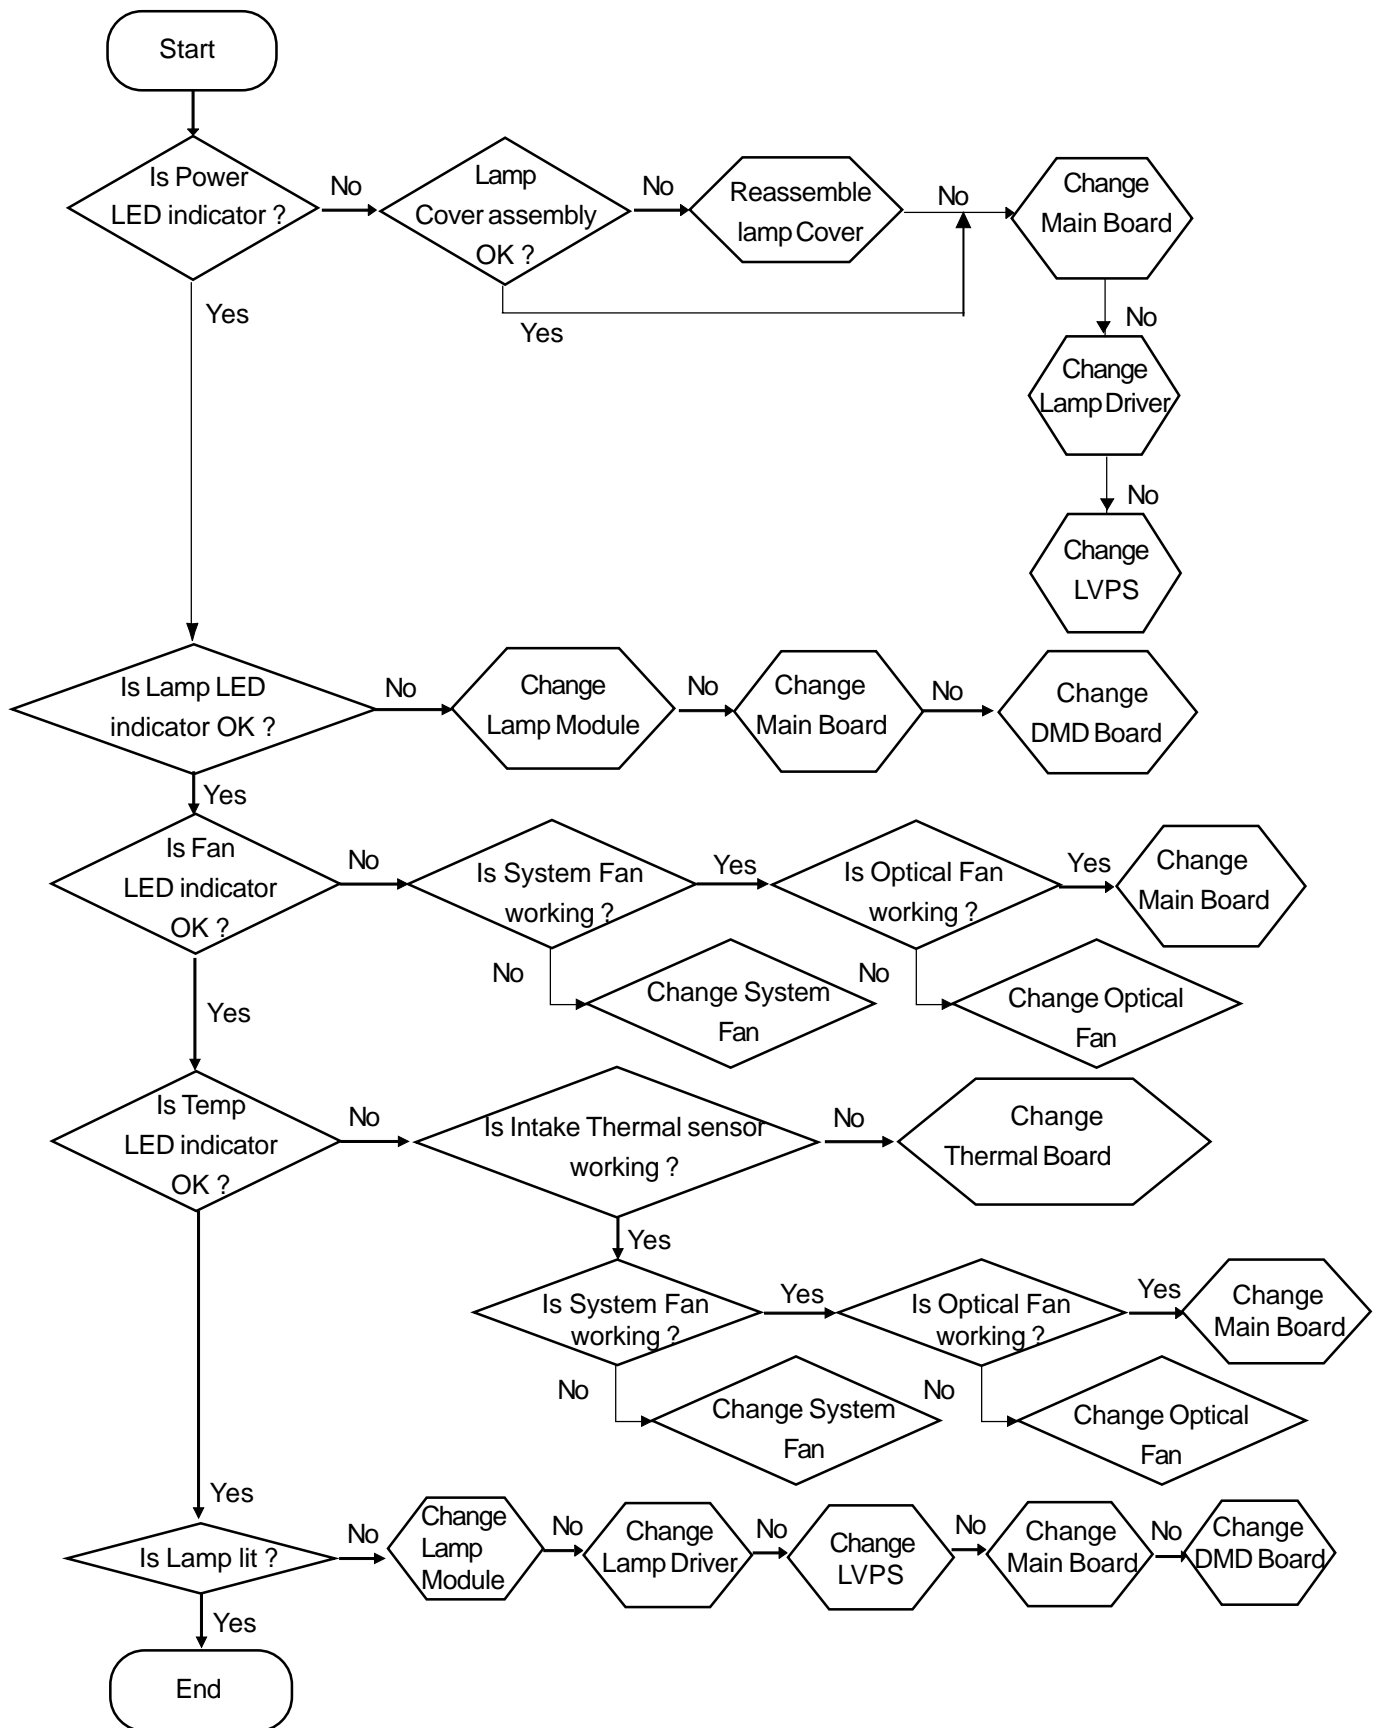

Update Change Parts	Version Update	Color Wheel Delay	RGB Level	Frequency	Phase	Reset Lamp Use Time	Reset All	Keystone Calibration (For T90 & S80 Series)
M/B	V	V	V	V	V		V	V
Firmware	V	V	V	V	V		V	V
DMD Board		V	V				V	
Engine		V						
Lamp Module						V		
LVPS								
Lamp Driver								

- 1.) Version Update : Refer Chapter 3-4 Hot Key, item 5
- 2.) Color Wheel Delay : Refer Chapter 3-4 Hot Key, item 7
- 3.) RGB Level : a. Press "Menu" button on the keypad to enter OSD function.
b. Press "UP" or "Down" button to select Image Adjustment Menu.
- 4.) Frequency : Press "Setup" button, then adjustment from "Frequency" mode.
- 5.) Phase : Press "Setup" button, then adjustment from "Phase" mode.
- 6.) Reset Lamp Use Time : Refer Chapter 3-4 Hot Key, item 3
- 7.) Reset All : Press "Menu" --> Default Setting Menu.

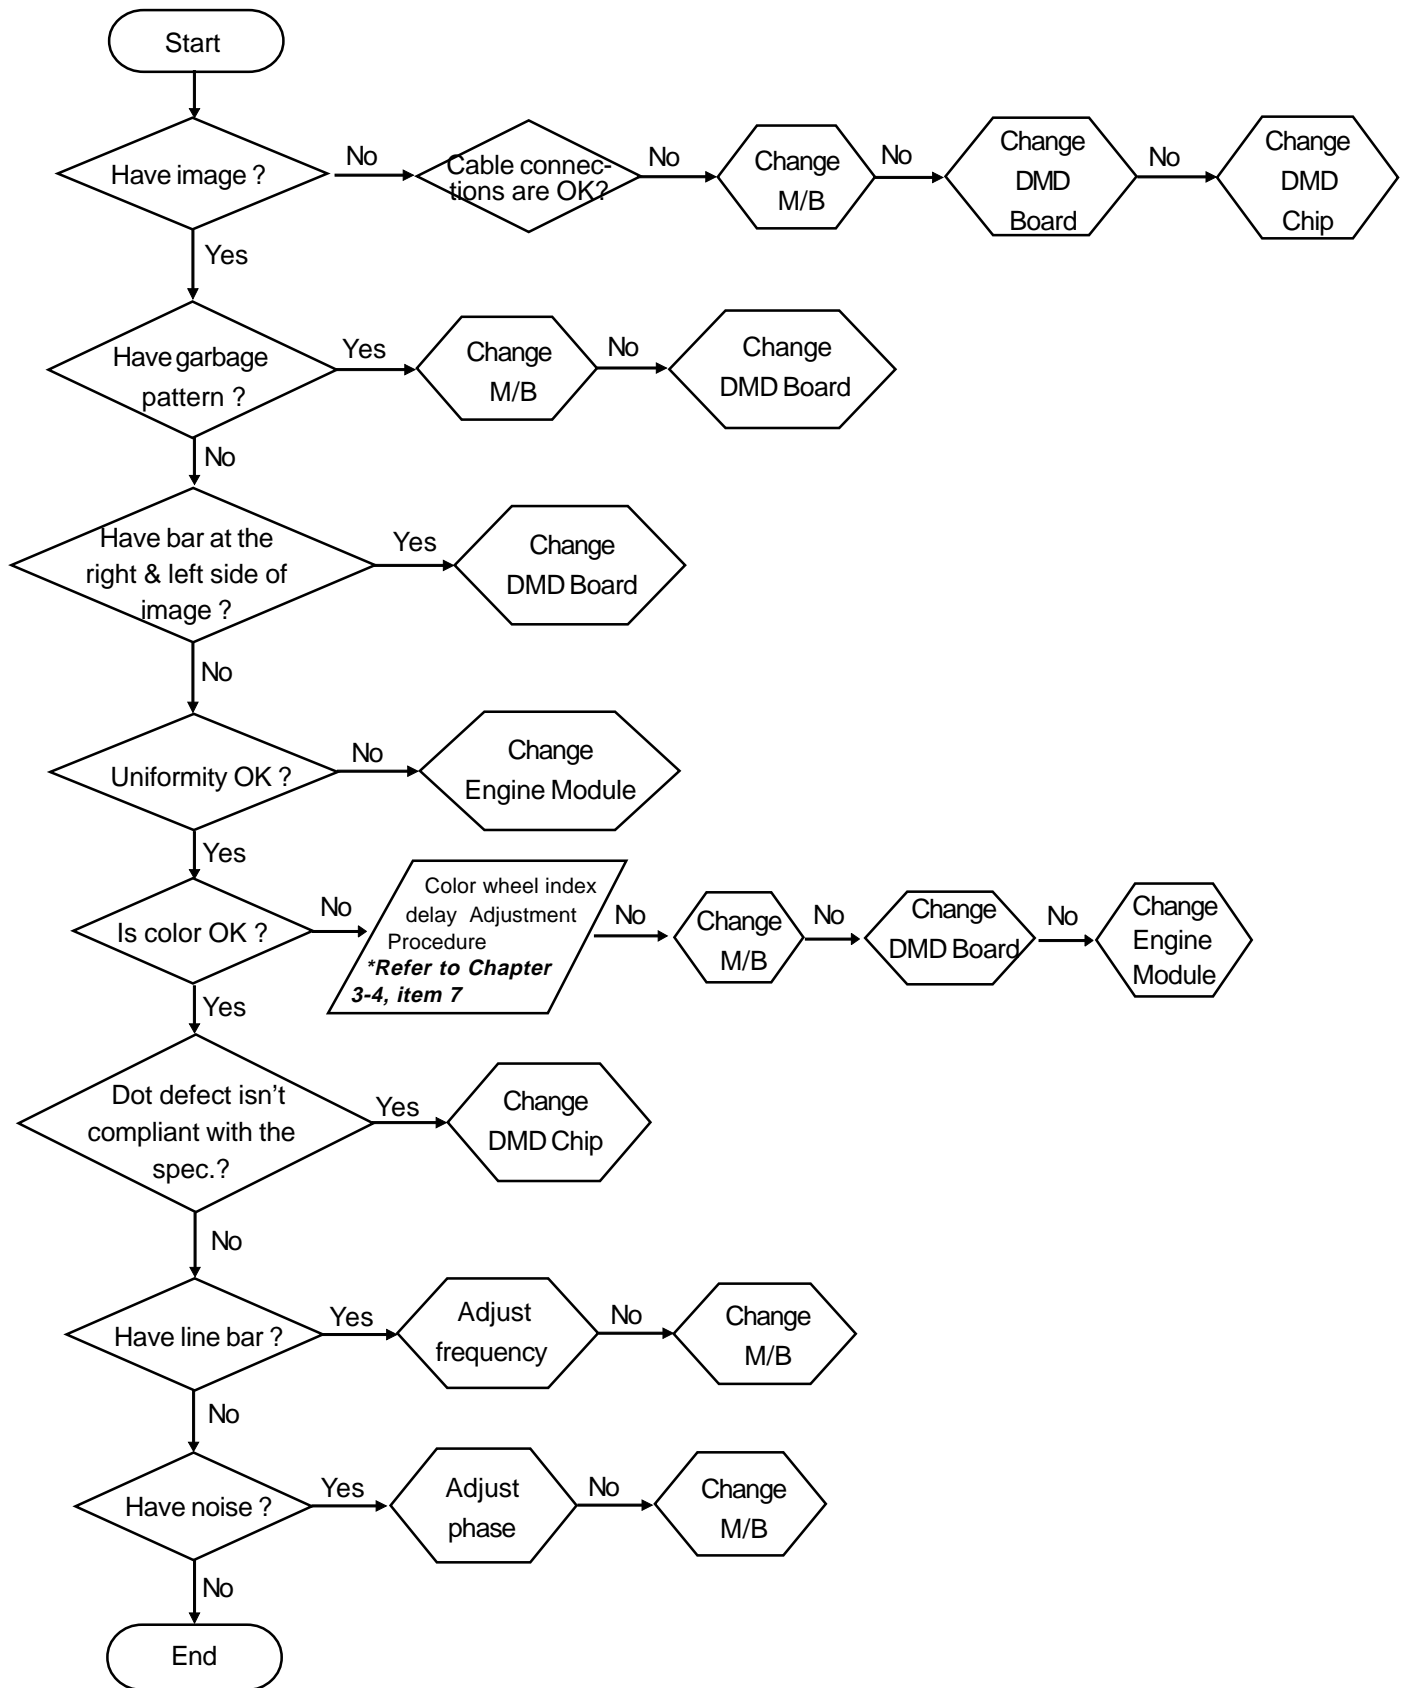

3-2 Main Procedure

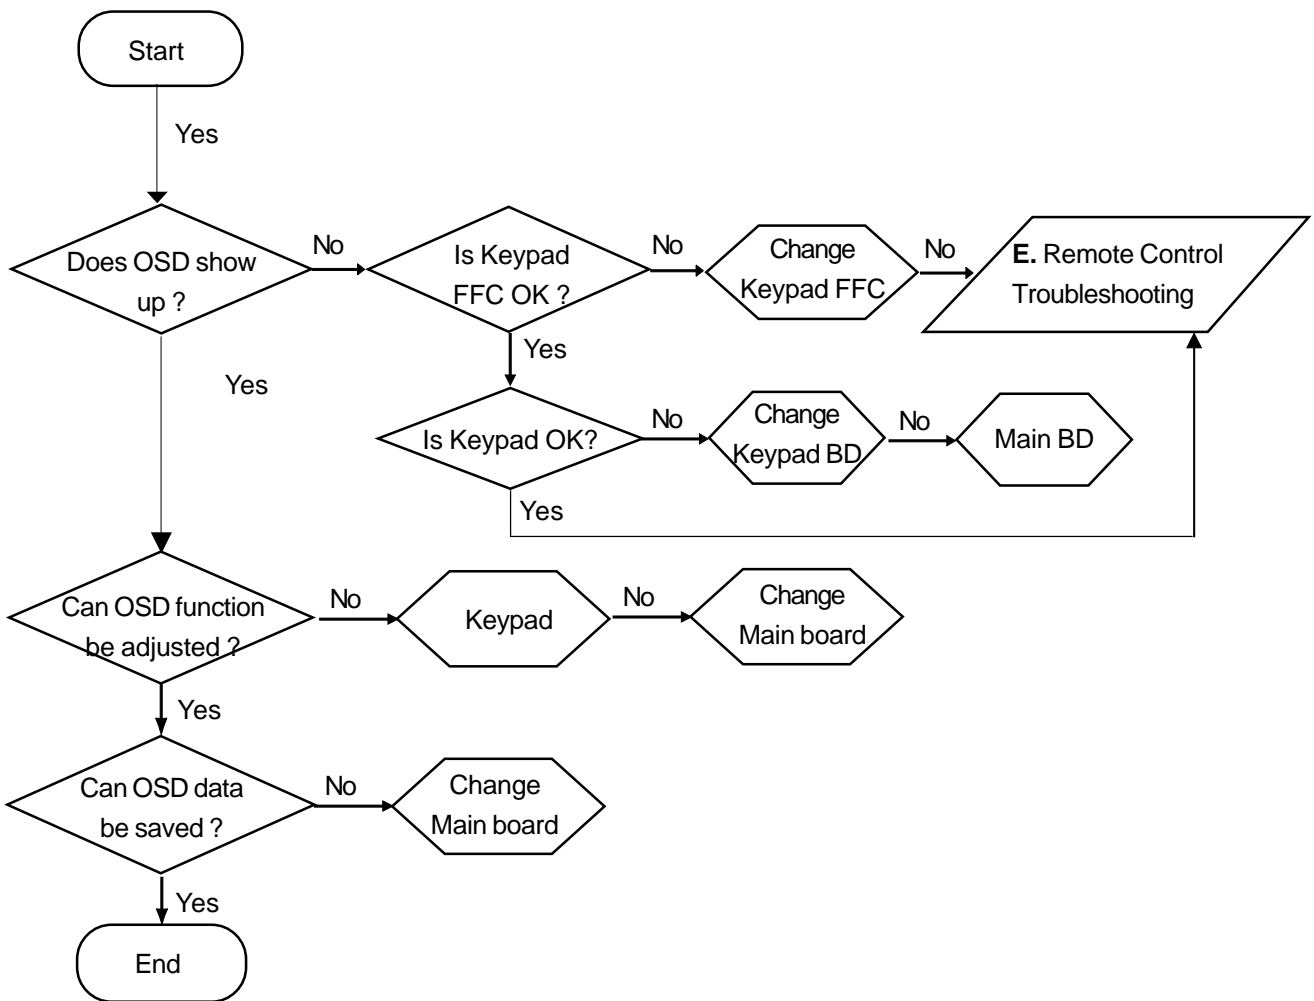

3-2.1 A. Power Troubleshooting

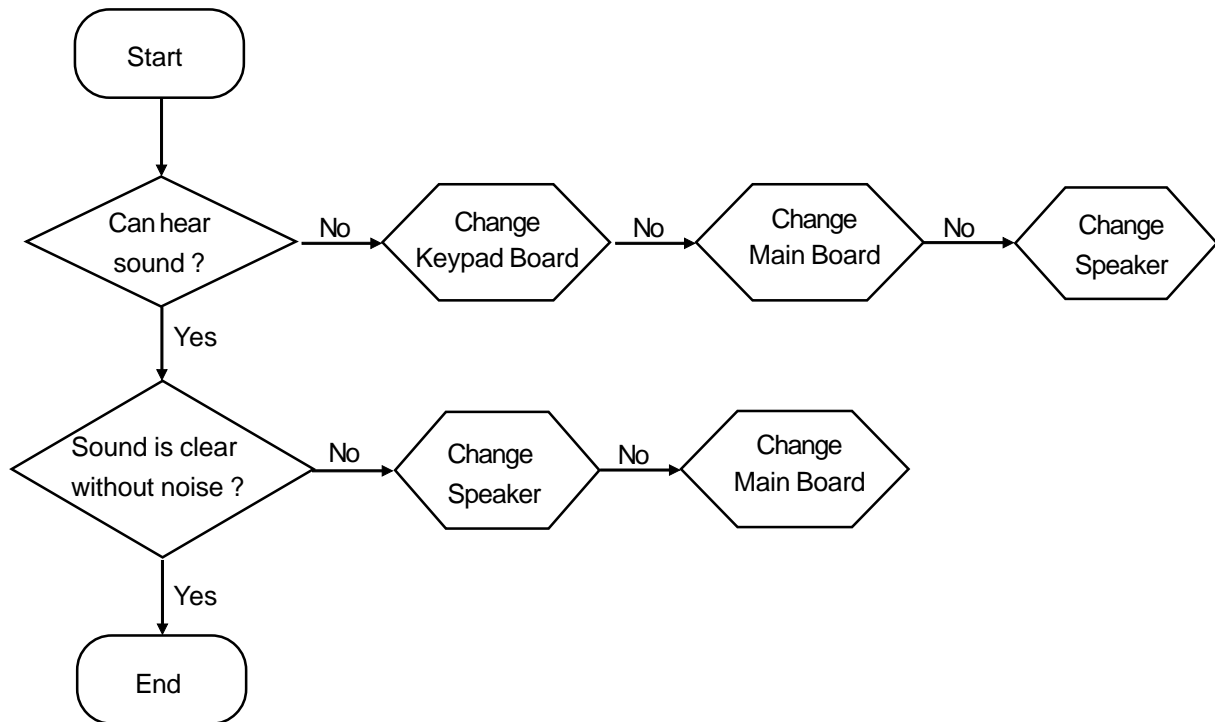

3-2.2 B. Image Performance Troubleshooting

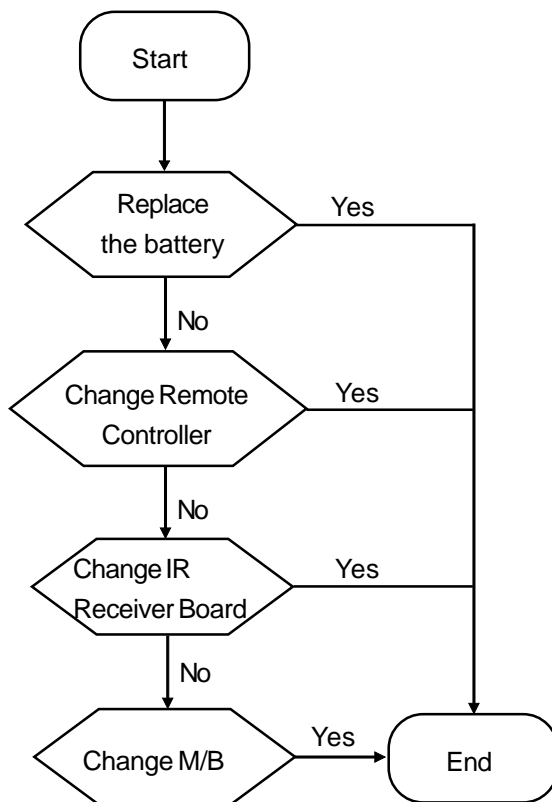

3-2.3 C. OSD Function Troubleshooting

3-2.4 D. Audio Troubleshooting

3-2.5 E. Remote Control Troubleshooting

3-3 Main Procedure Description

A. Power Troubleshooting

1.) No Power

- Check the Power Cord.
- Check the Lamp door.
- Ensure the keypad cable is well connected.

Judge

- Change LVPS or Main BD

2.) No Light

Lamp LED Indicator Fail

- Check all wires are well connected inside.
- Check Lamp Module

Temp LED Indicator Fail

- Turn on Main Power again.
- Check the Fan Module.
- Check the Thermal BD.
- Check the Thermal Switch.

Judge

- Change Lamp Driver or Main BD.

B. Image Troubleshooting

1.) No image on the screen.

- Ensure the signal cable and source are working fine.
- Press “Input” button to re-catch the signal again..

Judge

- Change Main BD or DMD BD or DMD Chip

2.) The image displayed with color issue

- Ensure the signal cable and source are working fine.
- Check the I/O connector
- Check Main BD if the image displayed without color abnormal issue when you input the signal with other ports.
- Check the photo sensor BD if the image displayed with color flicking issue.

Judge

- Adjust the RGB offset. ^{*Note}
- Adjust the color wheel index delay. (Refer to 3-4.5 CW index delay menu)
- Change Main board.

Note :

Press “Menu” button to enter setting display. Adjust the R-level, G-level, B-level.

3.) The image displayed with picture noise issue.

- Press “INPUT” button to re-catch the signal again.
- Check the signal cable.
- Check Main BD if there is no picture noise issue when you input the signal with the other connector.

Judge

- Change Main board.

4.) The image displayed with Dead Pixel/Line issue.

- Check the DMD chip if the bright dot issue when you input the signal.

Judge

- Change DMD board or DMD chip.

5.) The image displayed with focus issue.

- Adjust the focus ring.
- Ensure the projection distance is in spec.

Judge

- Change Optical Engine Module

6.) The image displayed with flicker issue.

- Check the Lamp Module
- Ensure the signal cable works well.
- Press “INPUT” button to re-catch the signal again.

Judge

- Change Main board or DMD board.

7.) The image displayed with uniformity issue.

- Ensure the projection lens is clean.
- Replace the lamp if the brightness is less than spec.

Judge

- Change the Optical Engine Module.

8.) The image displayed with line bar issue.

- Check if the line bar issue that can be fixed by “Frequency” function of OSD menu or not.

Judge

- Change Main board.

C. Audio Troubleshooting

1.) No Sound

- Press “VOL-“ or “VOL+” button on the keypad and check if the mute function is enabled.
- Check Main BD if there is audio sound output when you input the audio signal with other ports.
- Check the speaker

Judge

- Change Keypad BD

2.) The audio sound is output with noise

- Check the sound volume.
- Check the speaker.

Judge

- Change Main Board.

D. Remote Control Troubleshooting

1.) The OSD menu cannot show on the screen when you press the menu button on the remote controller.

- Replace the new battery if there is no laser output when you press the laser button on the remote controller.
- Replace a new remote controller if there is OSD menu showing on the screen when you press the menu button on the keypad.
- Check the Main BD if there is no function when you press the function button on the keypad.

E. Wireless Troubleshooting (for TW90 and SW80)

1.) Execute “Reset all” (in OSD menu) if the wireless function is not activated.

Note: Normally the background color is blue when the projectors are in standby mode (no any input source)

2.) Check the PC settings.

3.) Check the Projector setting. (Refer to Chapter 4, P4-10 Wireless Testing Procedure)

Judge

- Change Wireless Card and Wireless BD.

F. Camera Troubleshooting (for T91 and S81)

1.) Check if the Projector is normal. (Note : Don’t connect Camera for testing.)

2.) Check if VGA Cable is OK.

Judge

- Change Camera Module.

3-4 Factory Mode

Hot Keys to enter Factory Mode (T90 Series and S80 Series) (For TW90, it should have signal input)

[Press Volume button, set value to 9 and press “On/Standby”, “Input” and “Setup” button simultaneously.]

Repeat the above-mentioned procedure in the bracket three times.

Hot Keys to enter Factory Mode (MT200)

[Press the “ON/STANDBY” button and then press “Set up”, “Input” and “Up” () buttons simultaneously.]

Repeat the above-mentioned procedure in the bracket three times.

1. Press “INPUT” and “Up” button *simultaneously* to enter the keystone calibration menu.
2. Press “INPUT” and “Down” button to enter Burn-in mode menu.
3. Press “INPUT” and “Right” button to enter test pattern menu.
4. Press “Return” and “Up” button to enter Display the service status.
5. Press “Return” and “Left” button to enter Display the CW index delay menu.

3-4.1 Keystone calibration menu (For TDP-T90 and S80) (Press “INPUT” and “UP” button simultaneously to enter the keystone calibration menu)

KC0	xxx	xxxxx	xxxxx
KC1	xxx	xxxxx	xxxxx
KC2	xxx	xxxxx	xxxxx
KC3	xxx	xxxxx	xxxxx

Note :

There should be values in keystone calibration menu; otherwise Auto keystone and Auto setting will not function.

Key :

Up/Down	Choose an item with cursor
Enter	Execute automatic calibration
Setup	Initialize adjustment values

a.) Horizontal calibration

Requirement:

Put the projector on the stand which is horizontally and is not tipped (0 +/- 0.1 degree)

Procedure:

Choose KC0.

Execute automatic calibration.

If adjustment is successfully completed, values will change from default value “0”.

If it failed, values don’t change.

b.) Upward calibration

Requirement:

Put the projector on the stand which is tipped at upward more than 30 degree.

Procedure:

Choose KC1.

Execute automatic calibration.

If adjustment is successfully completed, values will change from default value “0”.

If it failed, values don’t change.

c.) Downward calibration

Requirement:

Put the projector on the stand which is tipped at downward more than 30 degree.

Procedure:

Choose KC2.

Execute automatic calibration.

If adjustment is successfully completed, values will change from default value “0”.

If it failed, values don’t change.

d.) Horizontal calibration after heat-run

Requirement:

Put the projector on the stand which is horizontally and is not tipped (0 +/- 0.1 degree)

Procedure:

Choose KC3.

Execute automatic calibration.

If adjustment is successfully completed, values will change from default value “0”.

If it failed, values don’t change.

e.) Save data to E2PROM

Procedure:

Push Up/Down/Left/Right at the same time.

If these key inputs are accepted, all LEDs light orange.

3-4.2 Burn in mode menu

(Press Hot Keys, then press “Input”+”Down” key simultaneously)

Burn-in mode			On		Off
On time			xxxxM		
Off time			xxxxM		
			Setting		Elapsed
Cycle			xxx		xxx
Elapsed time		xxxxxH		xxM	xxS
Error count		xxx	Shut down		xxx
Error log	xx	xx	xx	xx	xx
	xx	xx	xx	xx	xx

Key :

- Up/Down Choose an item with cursor
Left/Right Adjust a value / Choose a setting
Setup Initialize adjustment values

a.) Burn in mode setting

Procedure :

- Choose the burn-in mode.
Select a setting.

b.) Burn in on time setting

Procedure :

- Choose the on time.
Adjust a value.
Range is from 0 to 1275 minutes (5 minutes step).
0 means no on-time in the burn in mode.

c.) Burn in off time setting

Procedure :

- Choose the off time.
Adjust a value.
Range is from 0 to 1275 minutes (5 minutes step).
0 means no off-time in the burn in mode.

d.) Burn in cycle setting

Procedure :

- Choose the cycle.
Adjust a value.
Range is from 1 to 255 and INF which means infinity.

e.) Save setting to EEPROM

Procedure :

Push Up / Down / Left / Right at the same time.

If there key inputs are accepted, all LEDs light orange.

Besides, these settings are saved automatically when turning off the projector.

Notes :

If settings are valid, the burn in mode will start when the projector becomes the standby mode. Test patterns during the burn in mode are rotated on white, black, red, green and blue solid fields. The On LED blinks during the burn in mode.

Pushing the return key will cancel execution of the burn in mode.

When the burn in mode finishes, the projector becomes the standby mode automatically.

3-4.3 Test pattern menu

(Press Hot Keys, then press "Input"+"Right" key simultaneously)

Start-up
White
Black
Red 255
Green 255
Blue 255
Blue 60
Gray 60
Gray 30
Gray 10
Gray 7
Yellow
Magenta
Cyan
Two Zone Blue 60
Two Zone Gray 60
Cross Hatch

V-Ramp

Key :

Up / Down	Choose an item with cursor
Enter	Display a test pattern
Return	Return to the test pattern menu

Notes :

This menu is for test use.

No value will be saved.

3-4.4 Service status

(Press Hot Keys, then press “Return”+”Up” key simultaneously)

Version	xxxx-xxxx			
User lamp time	xxxxxH-xxM-xxS		xxx	
Panel time	xxxxxH-xxM-xxS		xxx	
Total time	xxxxxH-xxM-xxS			
Sub B	xxx-xxx-xxx	Sub C	xxx-xxx-xxx	
KC0	xxx-xxxxx-xxxxx	KC1	xxx-xxxxx-xxxxx	
KC2	xxx-xxxxx-xxxxx	KC3	xxx-xxxxx-xxxxx	
Fan1	xxxxxRPM	Fan2	xxxxxRPM	Fan3 xxxxxRPM
Temp1	xxxdeg	Temp2	xxxdeg	Temp3 xxxdeg
Engine No.	xxxxxxxxxxxx	Altitude	x	
C/W delay index	xxx	DMD bias	xxx	
Error count	xxx	Shut down	xxx	
Error log	xx-xx-xx-xx-xx-xx-xx-xx-xx-xx			

Notes :

The service status OSD is displaying factory settings. There is no item which can be operated. Right side numbers of the user lamp time and the panel lamp time mean reset counters of them.

The altitude is a setting of the fan high mode (Range is from 0 to 6).

The error count is the sum of all error counts.

A number in the error log means an error ID.

3-4.5 CW index delay menu (includes the DMD bias voltage) (Press Hot Keys, then press "Return" + "Left" key simultaneously)

C/W index delay	x		
DMD bias voltage	x		
White peaking	x		
Gammatable	x		
CSC table	x		
GAM	On		Off
CSC	On		Off

Key :

Up / Down	Choose an item with cursor
Left / Right	Adjust a value / Choose a setting
Setup	Initialize adjustment values

a.) CW index adjustment

Procedure :

Choose the C/W index delay.

Adjust a value.

Range is from 0 to 719.

Default value is 200.

Test Pattern : RGBW 64 scale.

b.) DMD bias voltage adjustment

Procedure :

Choose the DMD bias voltage.

Adjust a value.

Range is from B to E.

DMD Chip Default value is E.

c.) Save data to EEPROM

Procedure :

Push Up / Down / Left / Right at the same time.

If these key inputs are accepted, all LEDs light orange.

ID	Type	LED Pattern	Manual	Description	Detection Time
Normal Operating Group					
-	Standby		-	Standby state	-
-	Normal		-	Powered normal state	-
-	Displaying Image		-	Blinking 3 times just before displaying a image	-
-	Save Factory Data		-	Saving the factory data by the special key during the special mode	-
-	Cooling 1		-	In this cooling state, any operations are not acceptable	-
-	Cooling 2		-	In this cooling state, only turning-on is acceptable	-
Error Group					
-	Hang-up		o	Nonavoidable hang-up	-
1	Lamp Turn On Error		o	A lamp doesn't turn on T9x : Detection by UART / S2x : Detection by the status line	4.5 - 5.0 sec
4	Fan Speed Error 1		o	A speed of fan spinning is too slow (<= 1000 RPM) T9x : System Fan / S2x : DMD & Lamp Fan Also, when M62334 doesn't reply to I2C commands, this error will occur	7.0 - 13.0 sec
5	Fan Speed Error 2		o	A speed of fan spinning is too slow (<= 1000 RPM) T9x : Lamp Fan / S2x : Ballast Fan Also, when M62334 doesn't reply to I2C commands, this error will occur	7.0 - 13.0 sec
6	Fan Speed Error 3		o	A speed of fan spinning is too slow (<= 1000 RPM) T9x : Optical Fan / S2x : Power Fan Also, when M62334 doesn't reply to I2C commands, this error will occur	7.0 - 13.0 sec
8	Temperature Error 1		o	Temperature is too high (> T9x : 45 / S2x : 55 degree C) or too low (< -40 degree C) T9x : Intake Temperature Sensor / S2x : Intake Temperature Sensor Also, when G751 doesn't reply to I2C commands, this error will occur	7.0 - 13.0 sec
9	Temperature Error 2		o	Temperature is too high (> 90 degree C) or too low (< -40 degree C) T9x : Board Temperature Sensor / S2x : Lamp Temperature Sensor Also, when G751 doesn't reply to I2C commands, this error will occur	7.0 - 13.0 sec
10	Temperature Error 3		o	Temperature is too high (> 90 degree C) or too low (< -40 degree C) T9x : Reserved definition / S2x : DMD Temperature Sensor Also, when G751 doesn't reply to I2C commands, this error will occur	7.0 - 13.0 sec

Error detections are running during powered normal state.
In the burn in mode, ON LED is always blinking.

O : ON / L : LAMP / T : TEMP / F : FAN

 : Lit LED

 : Blinking LED

Function Test & Alignment Procedure

4-1 Product

- T80 / T90 / T91 / TW90 / MT200 / S80 / S81 / SW80

4-2 Test Equipment

- IBM PC with SXGA resolution (Color Video Signal & Pattern Generator)
- DVD player with component video(Y, Pb, Pr) and Multi-system(NTSC / PAL / SECAM)
- HDTV Tuner or Source (480i, 480p, 720p, 1080i)

4-3 Test Condition

- Circumstance Brightness :
 - a. Dark room less than 10 lux for functional inspection.
 - b. Circumstance brightness over than 500 lux for external inspection.
- Inspection Distance :
About 2.44m for functional inspection
(The projection distance has to be based on the screen size of 60 inches)
- Screen Size : 60 inches diagonal (wide)
- Each model should be cooling for 1 minutes after the run-in test.
 - 1.) In room temperature
 - 2.) With cycled display color (R,G,B,White)
- Test Display Mode & Pattern (Refer to 4-4.1 & 4-4.2)
- Function test and alignment procedure
- Run-in Time :
After changing all materials
 - 1.) For LVPS and Lamp Driver, it will run-in 2 hours.
 - 2.) For DMD BD, Main BD, Thermal BD and Engine, it will run-in 4 hours.

4-4 Test Display Modes & Pattern

4-4.1 Compatible Modes

T80/T90/T91/TW90 Computer Compatibility (Analog)

4-4.4 Function Test Display Pattern

PC Signal :

Item	Test Content	Pattern	Specification	Remark
1	Frequency & Tracking	Fine Line Moire	Eliminate visual wavy noise by Re-sync, Frequency or Tracking selection.	Figure 1
2	Contrast/Brightness	32 Gray Scale / 64 RGBW scale	Gray level should be distinguishable and without color abnormal.	Figure 2, 3
3	R, G, B and White Color Performance	R, G, B and White Color	Each R, G, B color should be normal without color abnormal issue.	Figure 4~7
4	Screen Uniformity	Full White	Should be compliant with 65%. (Minimum)	Figure 7
5	Dead Pixel (Bright pixel)	Full Black	Cannot accept any bright pixel.	Figure 8
	Dead Pixel (Dark pixel)	Full White	The numbers of dead pixel should be smaller or amount to 8 pixels.	Figure 7
6	Blemish (Bright)	Full Black / Gary 30	The bright blemish cannot be accepted if the problem appears with Gary 30 pattern.	Figure 8, 9
7	Blemish (Dark)	Full white / Blue 60	The dark blemish cannot be accepted if the problem appears with Blue 60 pattern.	Figure 7, 10
8	Focus	Text Pattern	The text in the corner should be clear after adjusting the focus ring.	Figure 11
9	Boundary	Boundary Frame	Horizontal and Vertical position of video should be adjustable to be the screen frame.	Figure 12

Figure 1. Fine Line Moire

Figure 2. 32 Gray Scale

Figure 12. Boundary Frame

Video & Audio Signal :

Item	Test Content	Specification	Remark
1	Composite Video	The input signal has to display without color abnormal. The Video selection of OSD	
2	S-Video	The input signal has to display without color abnormal.	
3	Component Video	The input signal has to display without color abnormal.	
4	HDTV	The input signal has to display without color abnormal.	

4-5 Inspection Procedure

Elevator Function :

- Please check and ensure the function of elevator works well.
- If not, please return the unit to repair area.

Keypad Function (Including Remote Control) :

- Please check and ensure the control function of keypad works well.
- If not, please return the unit to repair area.

Reset :

Please press “Menu” button on the projector panel to enter “Reset all” function. This action will allow you to erase all end user’s settings and restore the original factory settings. Then choose “YES” and press “Enter” to see if it works.

Frequency and Tracking :

Test Signal : 1280*1024 @ 75Hz

Test Pattern : Fine Line Moire Pattern

- Check and see if image sharpness and focus are well performed.
- If not, readjust by following steps.
 1. Select “Frequency” function to adjust the total pixel number of pixel clock in one line period.
(Refer to Chapter 3-1 Equipment Needed, item 4)
 2. Then select “Phase” function and use right or left button to adjust the value to minimize video flicker.
(Refer to Chapter 3-1 Equipment Needed, item 5)

R, G, B and white color contrast :

Test Signal : 1280*1024 @ 75Hz

Test Pattern : 64 RGBW scale pattern

- Please check and ensure if each color is normal and distinguishable.
- If not, please return the unit to repair area.

Screen Uniformity :

Test Signal : 1280*1024 @ 75Hz

Test Pattern : Full white pattern

- Please check and ensure the unit is within the spec. (65% Minimum)
- If not, please return the unit to repair area.

Dead pixel (Bright pixel) :

Test Signal : 1280*1024 @ 75Hz

Test Pattern : Full black pattern

- Please check and ensure the unit is within the spec. (Cannot accept any bright pixel)
- If not, please return the unit to repair area.

Dead pixel (Dark pixel) :

Test Signal : 1280*1024 @ 75Hz

Test Pattern : Full white pattern

- Please check and ensure the unit is within the spec.
The number of dark pixels cannot exceed 8 pixels.
- If not, please return the unit to repair area.

Blemish (Bright) :

Test Signal : 1280*1024 @ 75Hz

Test Pattern : Full black and Gray 30 patterns

- Please check and ensure the unit is within the spec.
(The bright blemish should not be seen under Gray 30 pattern)
- If out of spec, please return the unit to repair area.

Blemish (Dark) :

Test Signal : 1280*1024 @ 75Hz

Test Pattern : Full white and Blue 60 patterns

- Please check and ensure the unit is within the spec.
(The dark blemish should not be seen under Blue 60 pattern)
- If out of spec, please return the unit to repair area.

Focus :

Test Signal : 1280*1024 @ 75Hz

Test Pattern : Text pattern

- Please check and ensure the unit is within the spec.
(The text in the corner should be shown clearly)
- If not, please return the unit to repair area.

Boundary :

Test Signal : 1280*1024 @ 75Hz

Test Pattern : Boundary frame pattern

- Please check and ensure the unit is within the spec.
(The horizontal and vertical position of image should be adjustable to be the screen frame.)
- If not, please return the unit to repair area.

Video :

Test Signal : Composite video, S-Video and Component video

Test Pattern : NTSC, PAL, SECAM

- Please check and ensure the unit can display the video signal without color abnormal or image abnormal issue.
- If not, please return the unit to repair area.

HDTV :

Test Signal : HDTV signal

Test Pattern : 480i, 480p, 720p, 1080i

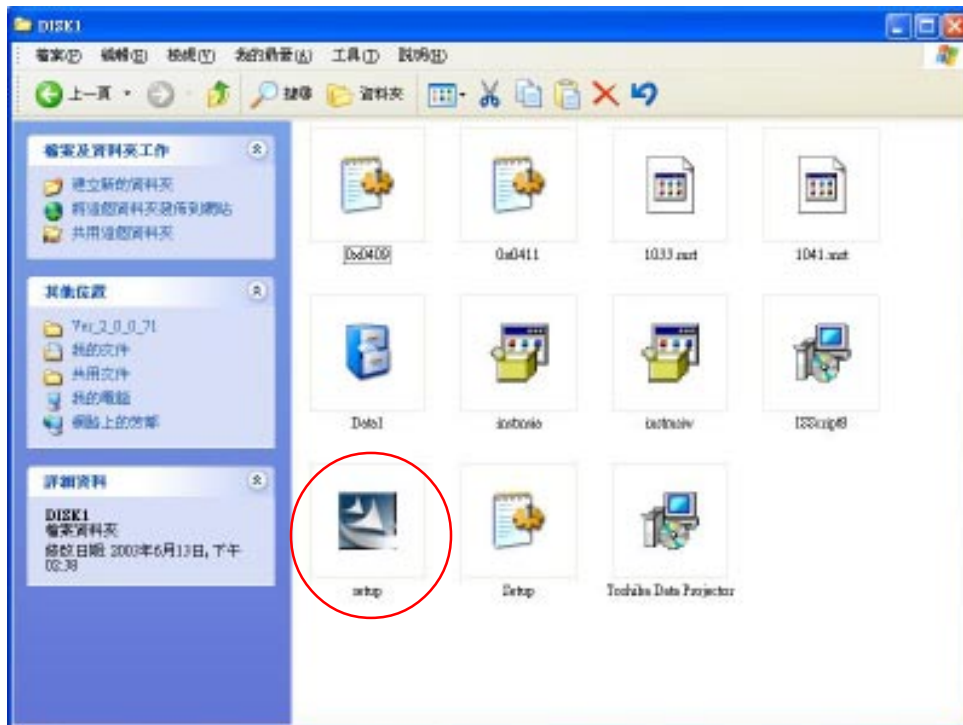

- Please check and ensure the unit can display the HDTV signal without color abnormal or image abnormal issue.
- If not, please return the unit to repair area.

4-6 Wireless Testing Procedure (For TW90 and SW80)

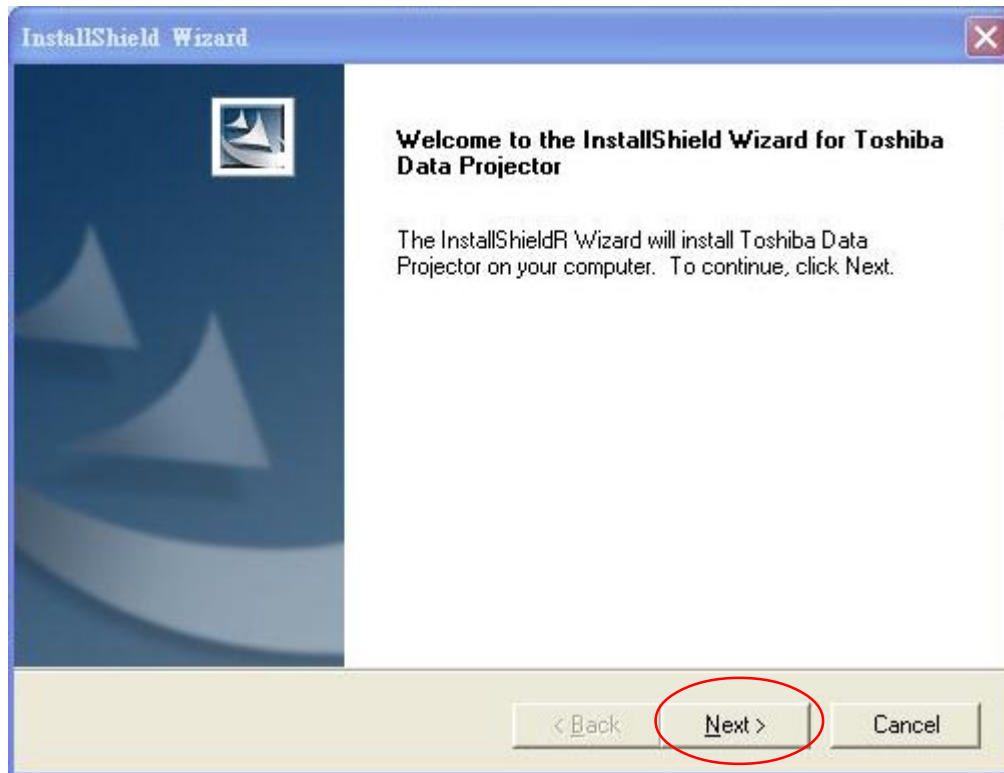

- Software : Wireless Utility

4-6.1 Wireless Setup Procedure

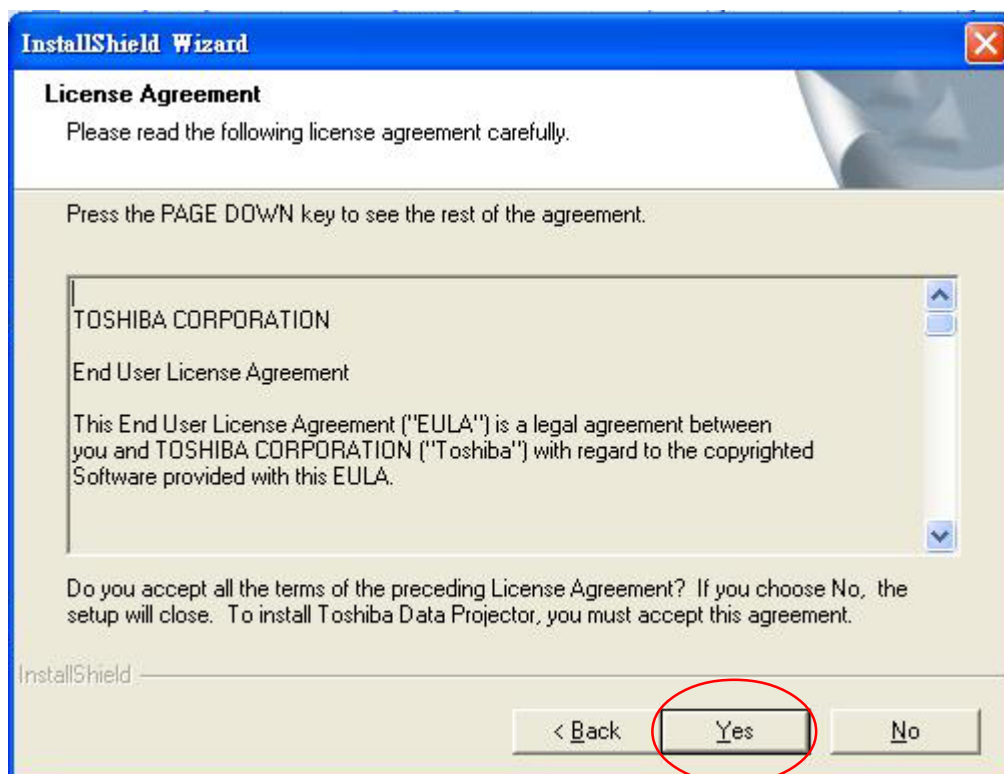

1. Press “Setup” icon to execute the program.

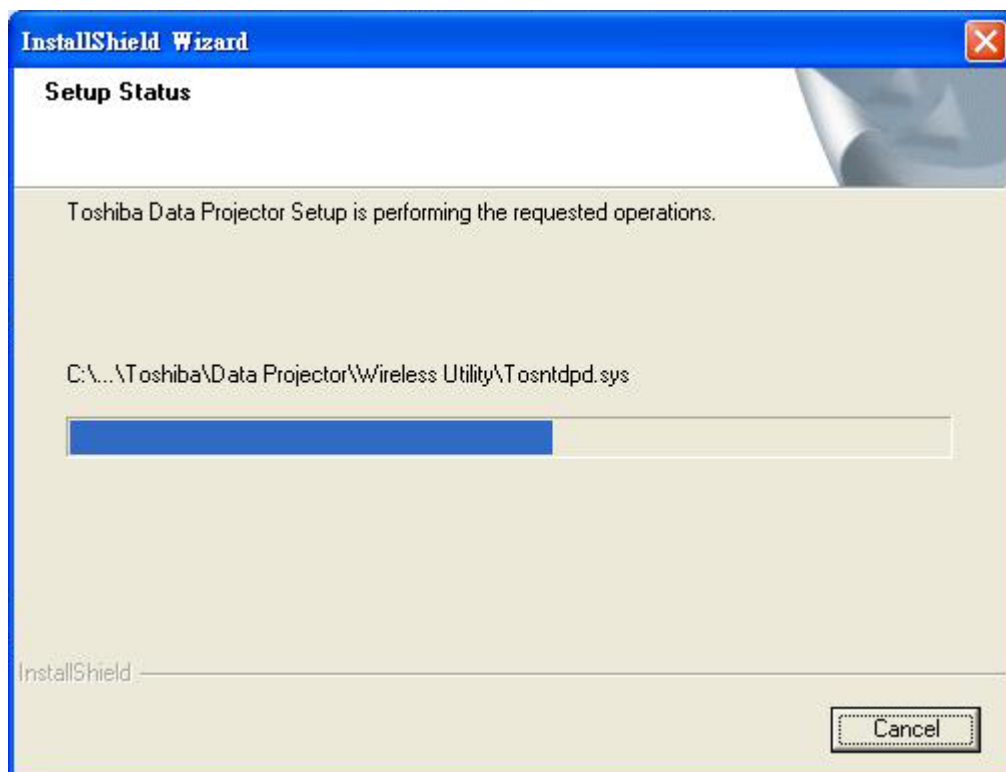

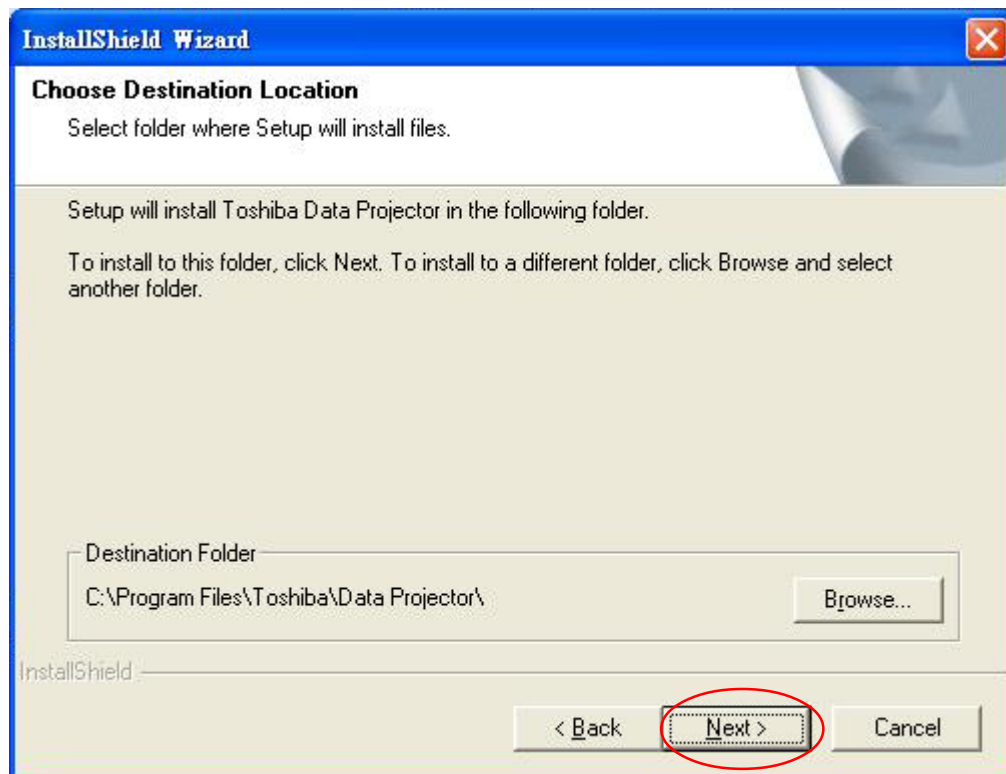

2. Press "Next" icon.

3. Press "Yes" icon.

4. Press “Next” icon.

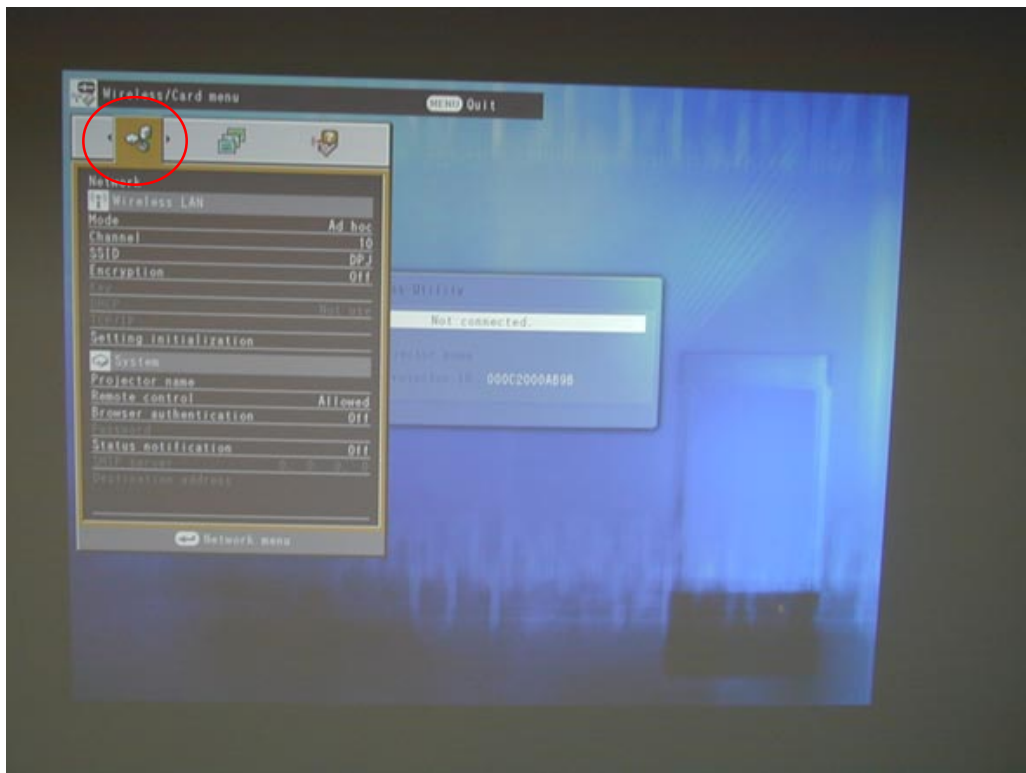

5. Choose “Yes, I want to restart my computer now”, then press “Finish” icon.

4-6.2 Projector Setup Procedure

1. Press “Menu” twice, then into “Wireless setting” mode.

2. Choose “Ad hoc” function.

3. Choose “Projector name” function.

4. Key-in any English name when the “Projector name” appears on the screen.

Note :

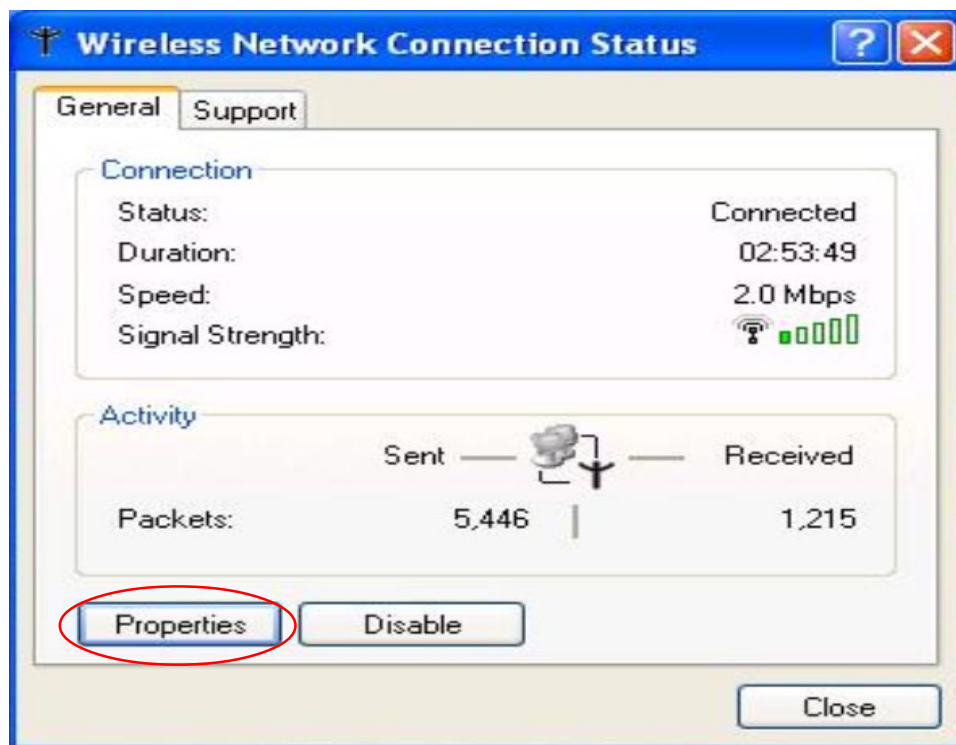

1. “Ad hoc” function is P to P(Point to Point) transmission.
2. The “Projector Name” can be keyed in by the Remote Control.

4-6.3 Network Setup Procedure

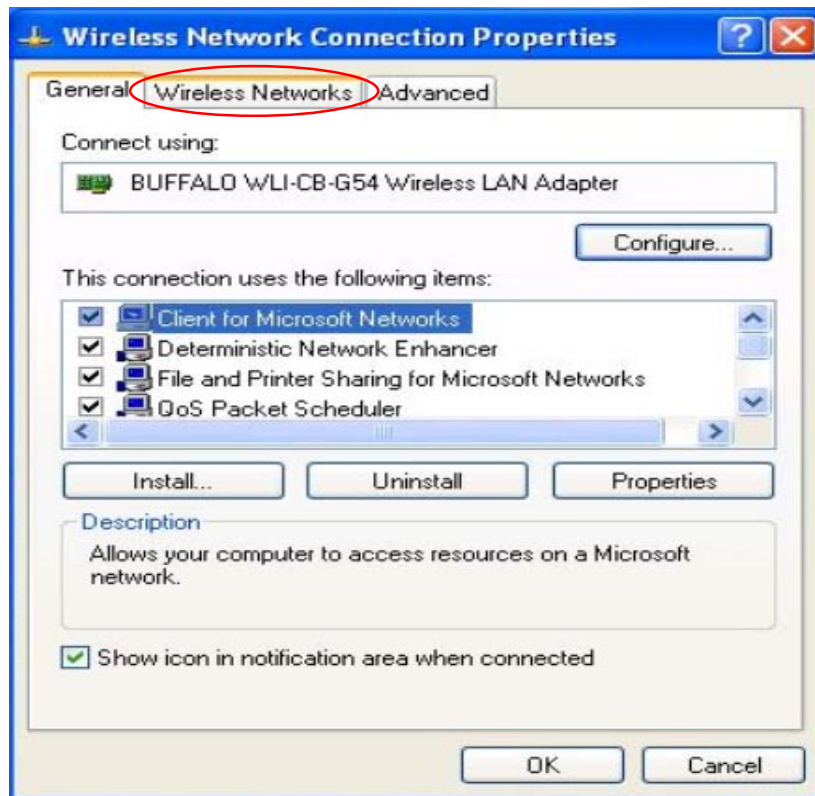

1. Press “Wireless Network Connection”.

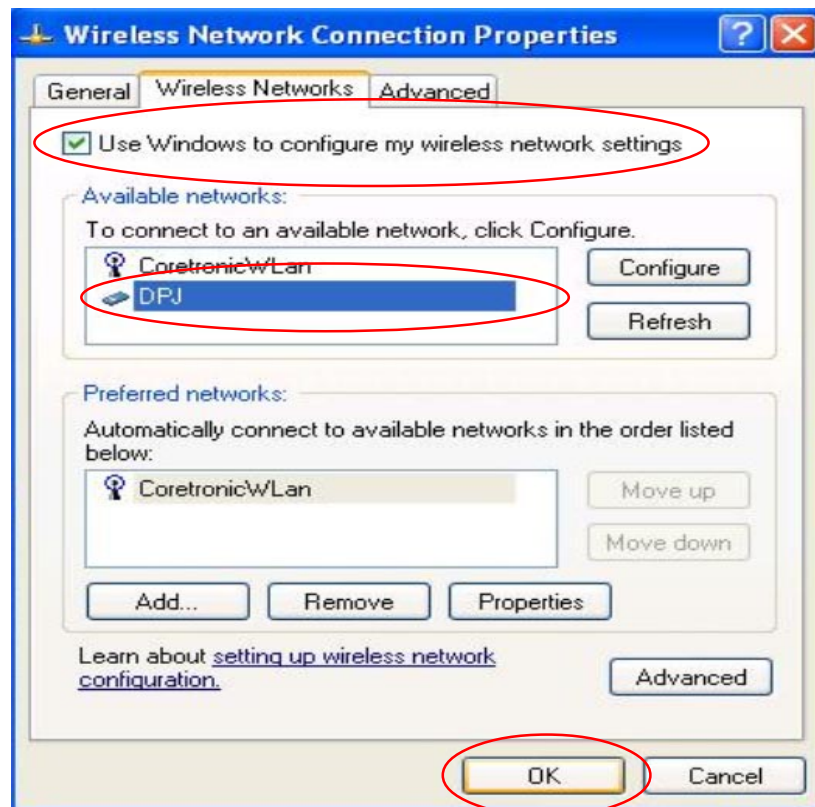

2. Click “Properties”.

3. Select “Wireless Networks”.

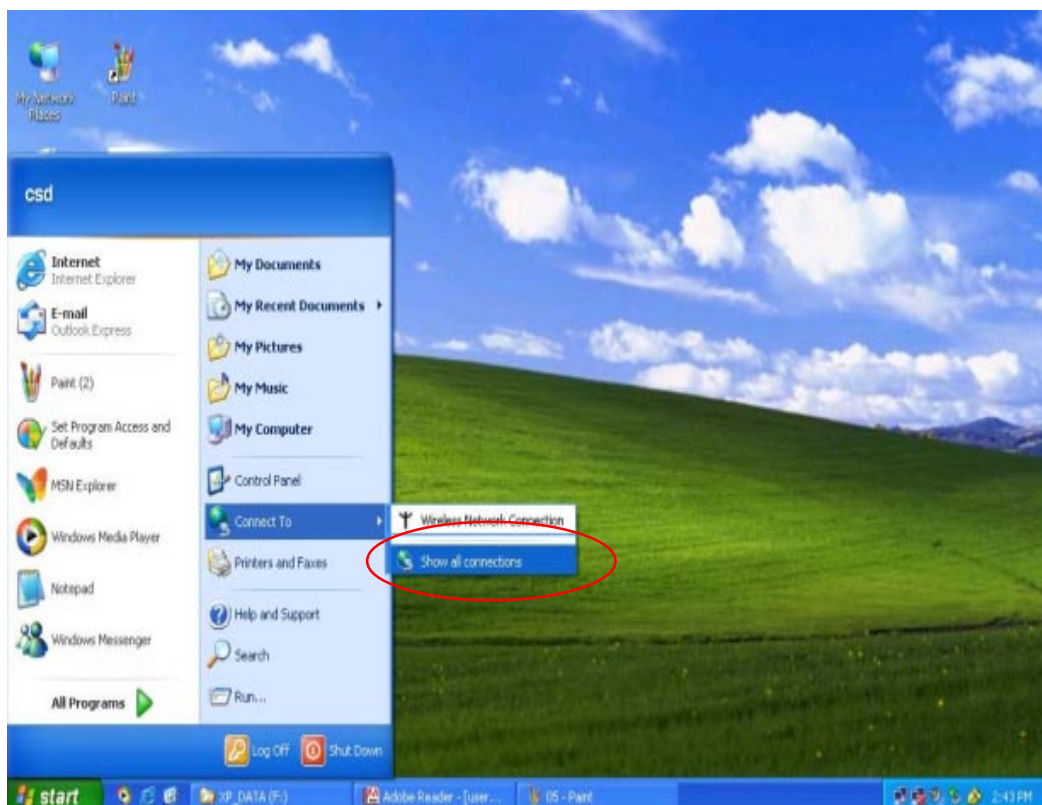

4. Click “DPJ” and then press “Ok”.

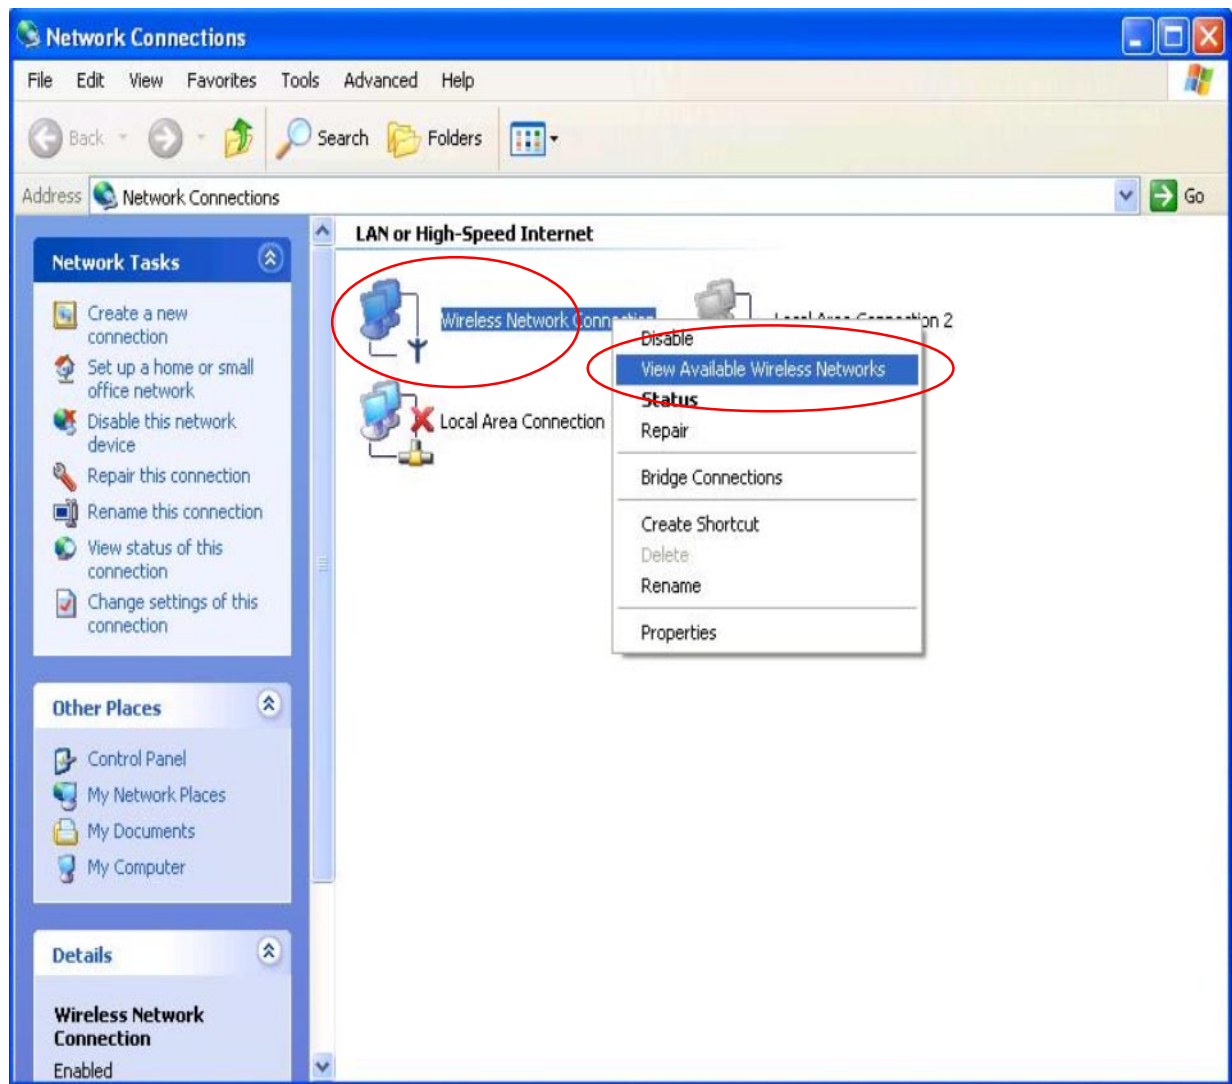

5. Click “Close”.

6. Select “Show all connections”.

7. Right click “Wireless Network Connection” and select “View Available Wireless Networks”.

8. Choose “DPJ” and check the below box “Allow me to connect to.....”, and then press “Connect”.

9. If the wireless connection is well established, the below message will appear on the task bar.

10. Execute “Wireless Utility” program.

11. Choose the Projector name, and then press “GO” button to link the Projector. Then you will find the projectors and your PC(or laptop) are wireless connected.

The “Projection name”
is the name you keyed
in by the remote
control previously

4-7 Camera Setup Procedure (For T91 and S81)

4-7.1 Equipment Needed

- T91 Projector * 1
- Camera * 1
- VGA Cable * 1 (Special)

4-7.2 Setup Procedure

1. Connect Camera to the 2nd VGA port of T91 by VGA Cable.

2. Power on the Projector. Press “Input” button on the Keypad.

Note : Projector will find Image function from Camera automatically.

Firmware Upgrade Procedure

5-1 Equipment Needed

Hardware :

- Firmware Cable
- PC
- T80 / T90 / T91 / TW90 / MT200 / S80 / S81/ SW80 Projector

Software :

- DLP composer
- DDP2000~1.img

Environment :

- Windows 98 / 2000 / XP

Firmware Cable

5-2 Setup Procedure

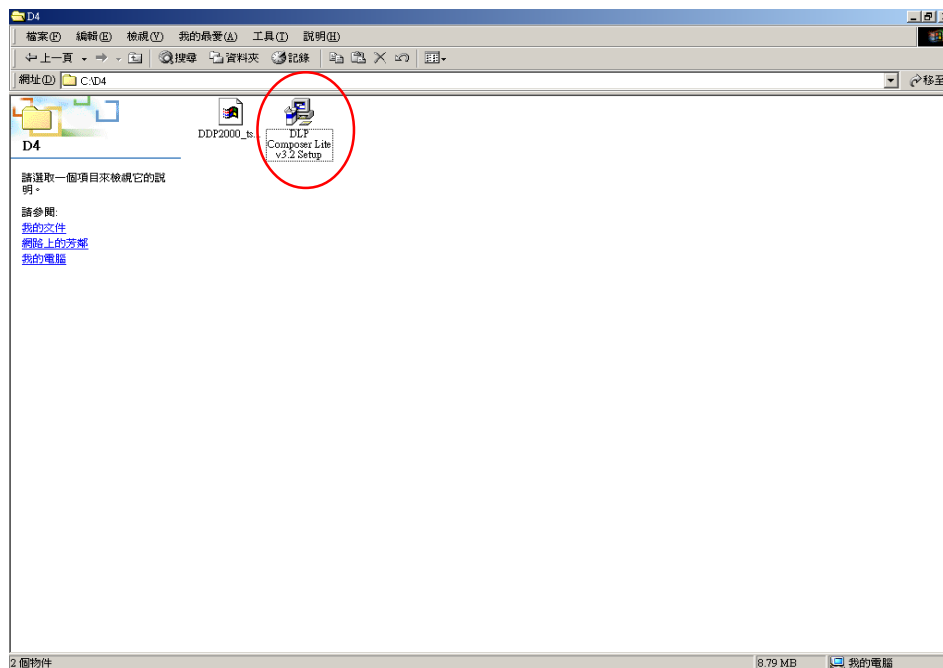

1. Connect Firmware cable to Projector and COM1 or COM2 (Serial port) of PC.

Note: If you use DLP Composer Lite V3.2, you have to connect the firmware cable to **COM2** of PC. If you use DLP Composer Lite V3.6, you can connect the firmware cable to **COM1** or **COM2**.

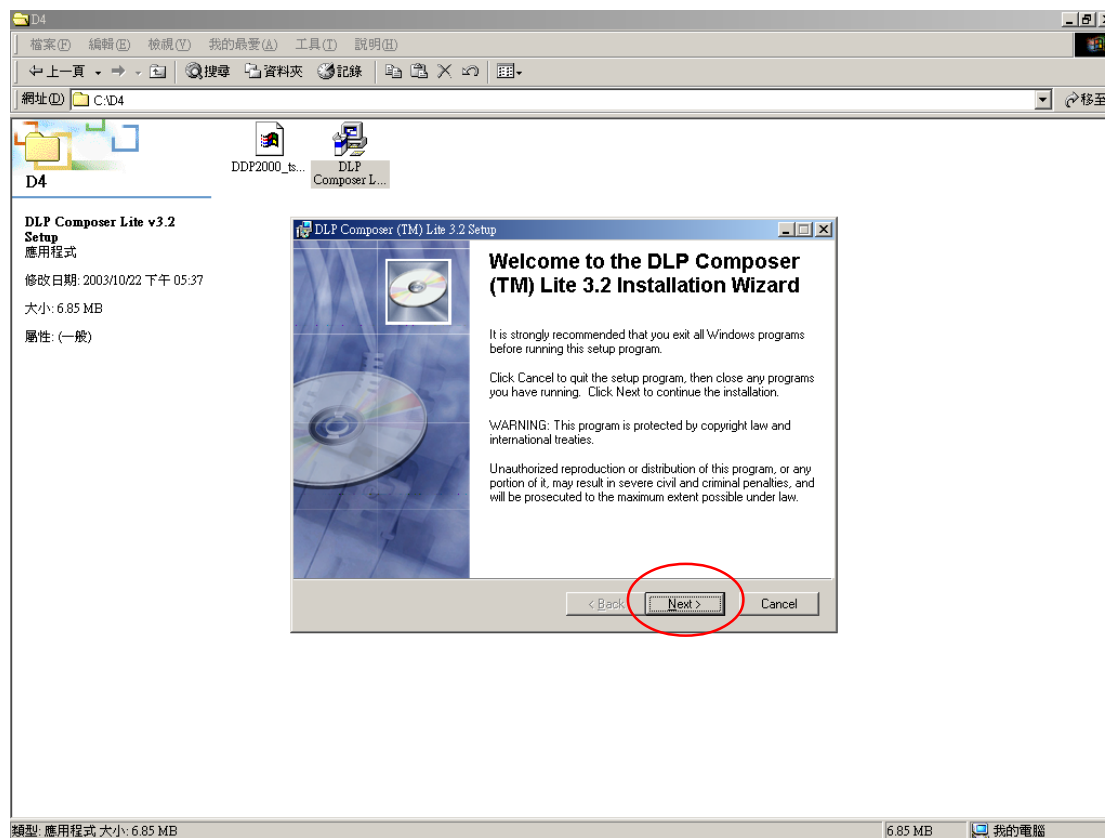

DLP composer Setup :

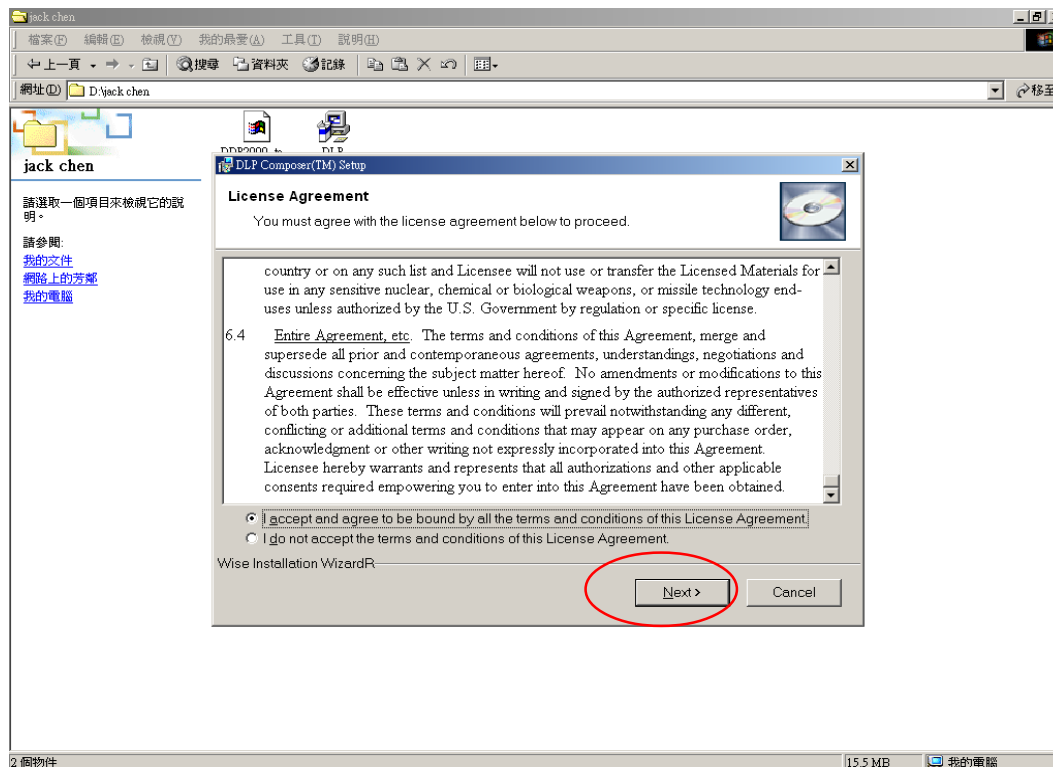

1. Execute “DLP Composer Lite Setup.exe” to start the setup procedure.

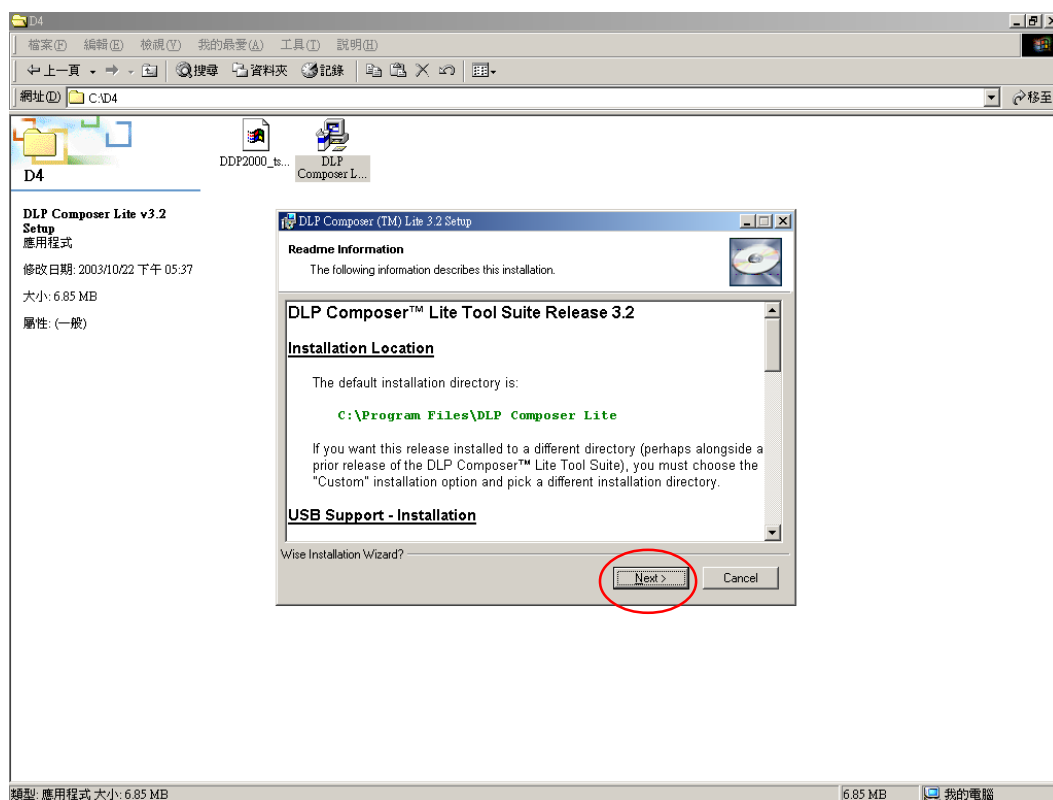

2. Press “Next” button.

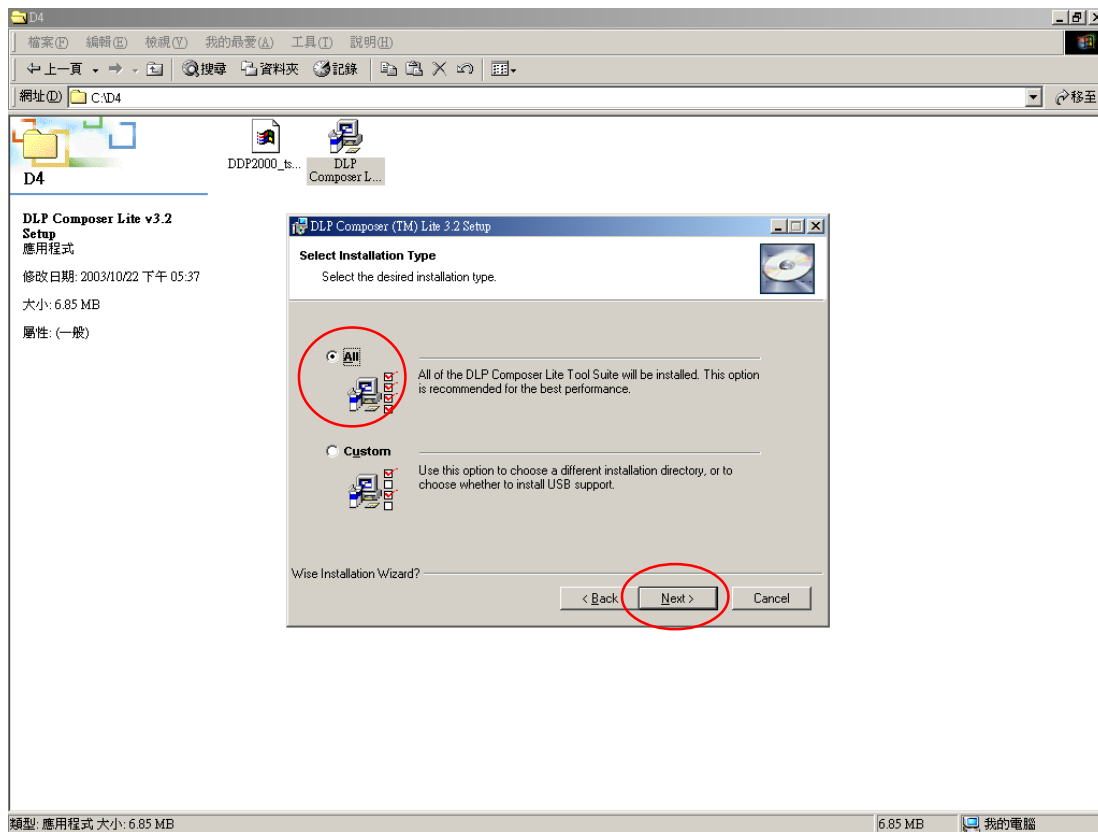

3. Choose the “I accept and agree to be bound by all the terms and conditions of this License Agreement”.
- Then press “Next” button.

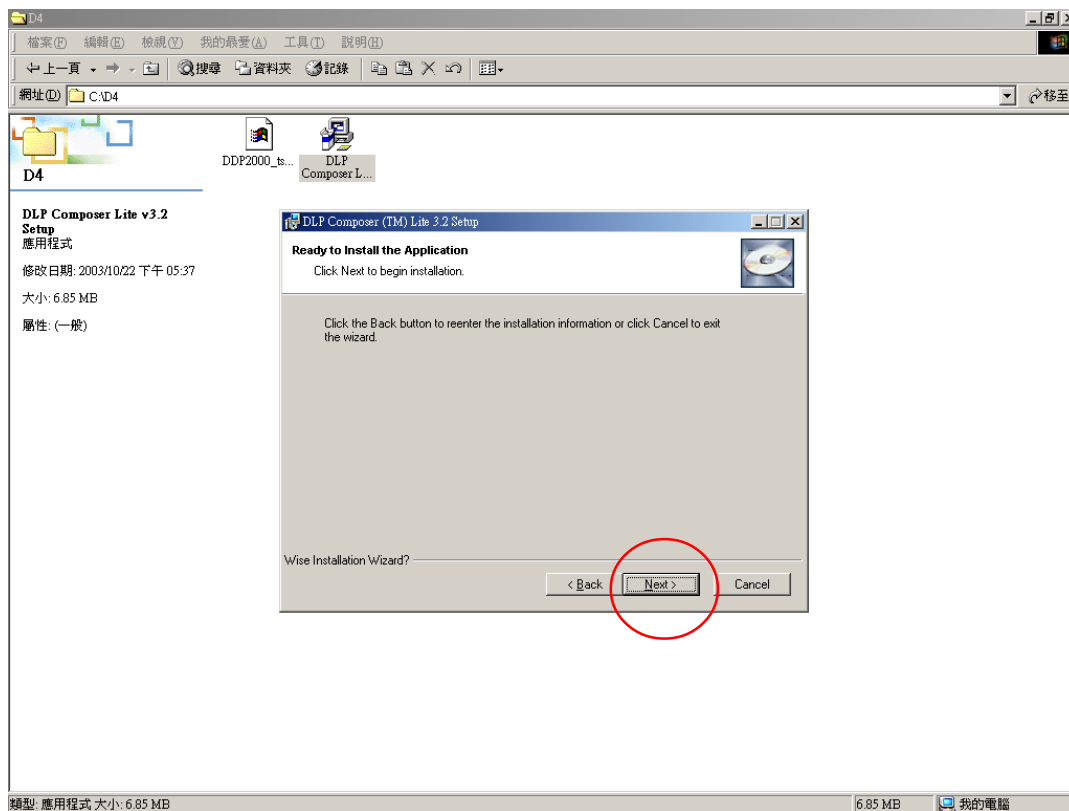

4. Press “Next” button.

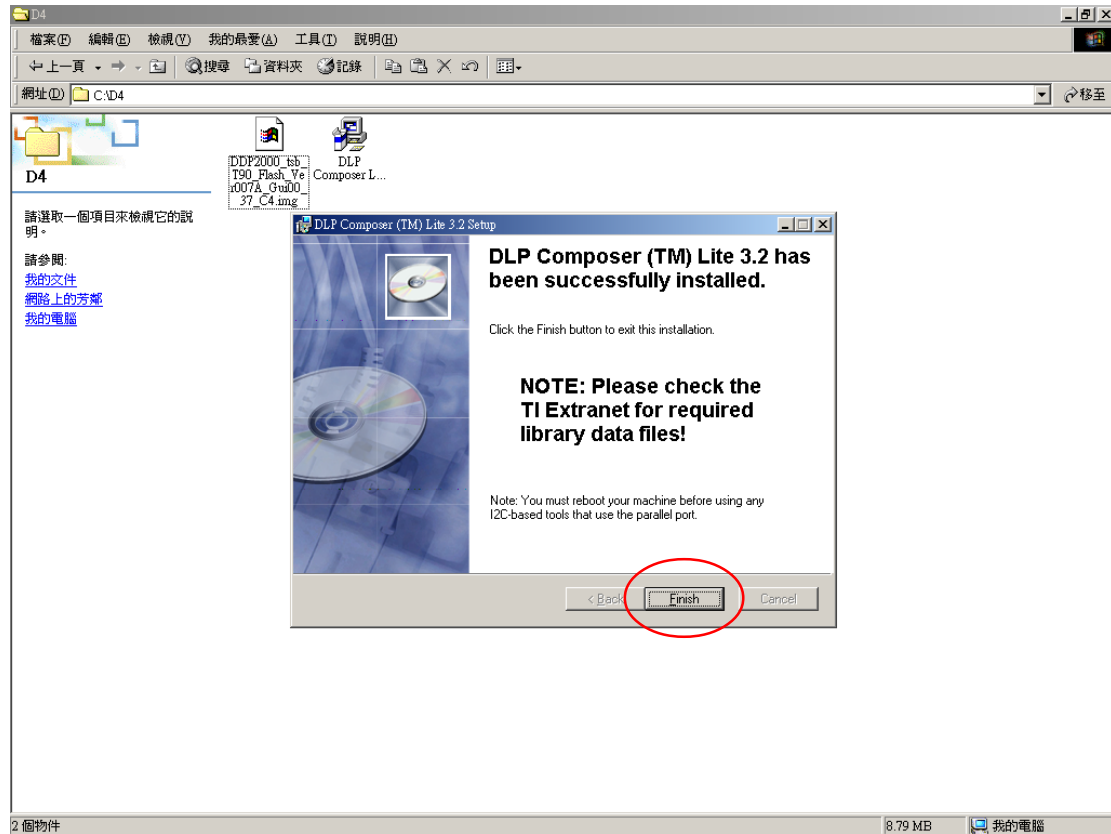

5. Choose “All” icon and then press “Next” button.

6. Press “Next” button.

7. Press “Next” button.

8. Press “Yes” button to reboot.

5-3 Firmware Upgrade Procedure

1. Press and hold “Input” and “Setup” buttons simultaneously and then power on the Projector to enter the firmware upgrade mode.

Note : If the firmware upgrade mode is activated, the LEDs of LAMP, TEMP and FAN will be blinking.

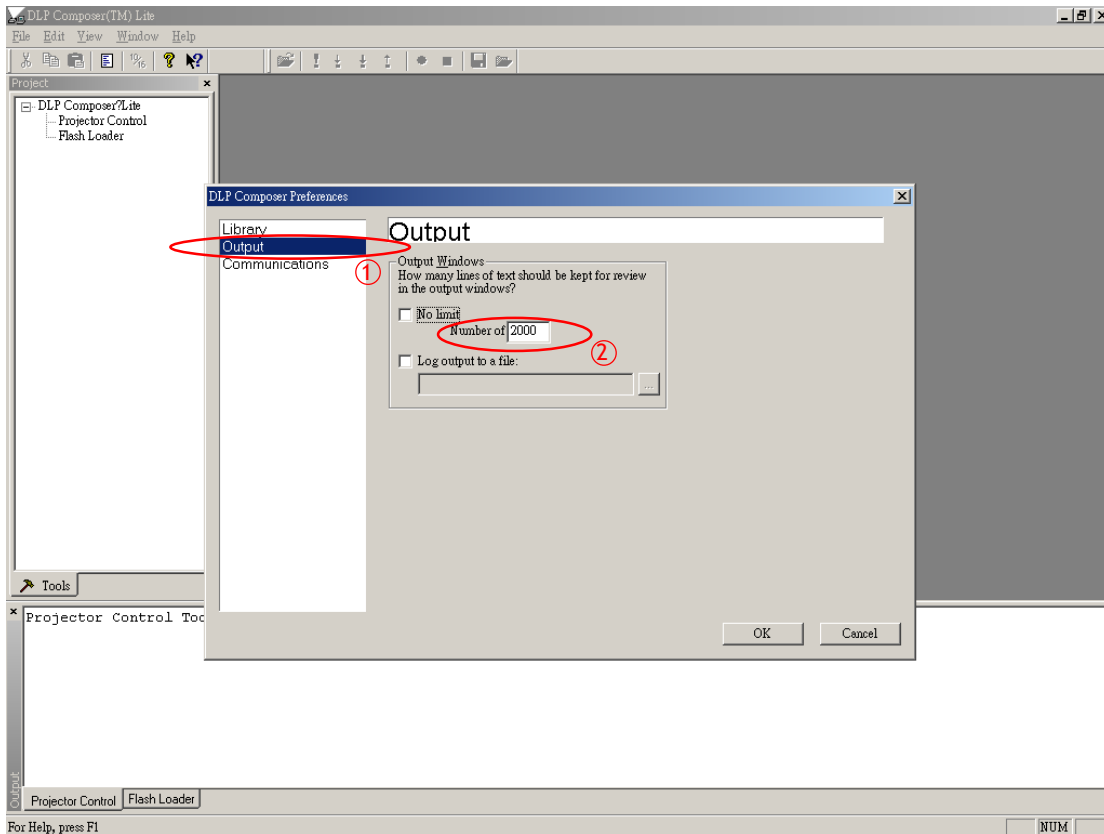

2. Execute “DLP Composer” program.

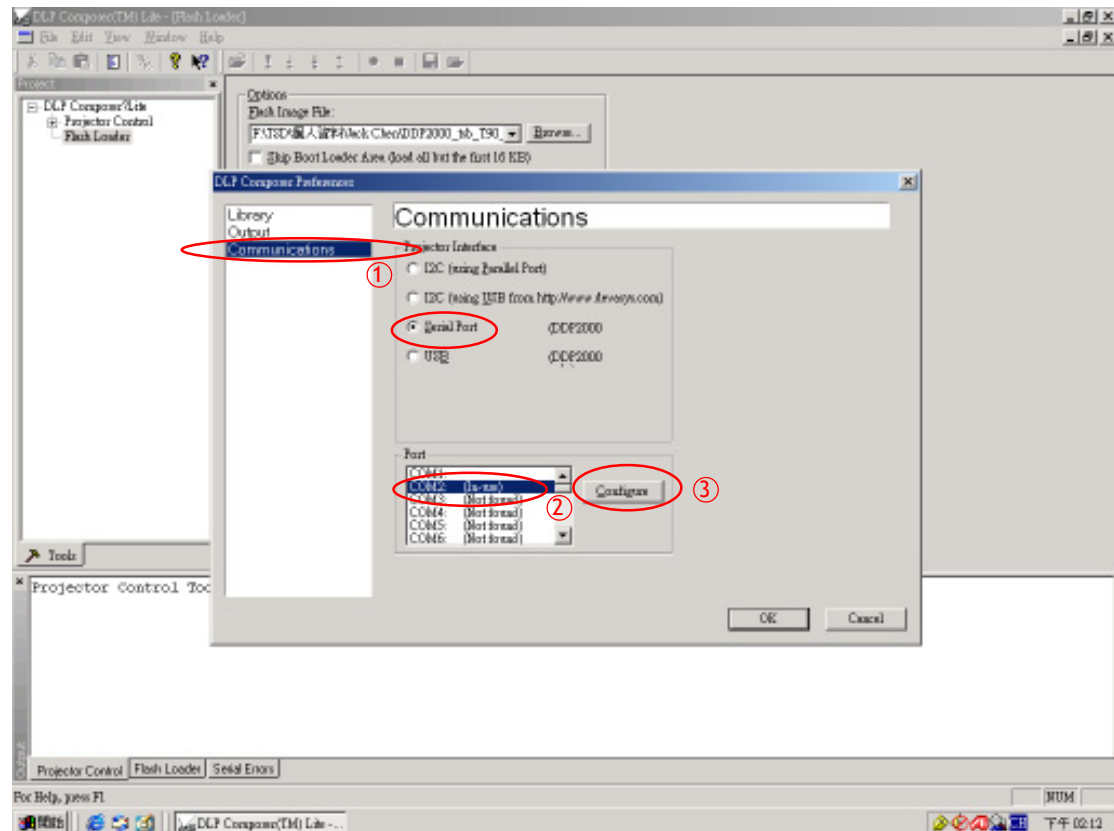

3. Choose “Edit-->Preferences” to setup Firmware upgrade status.

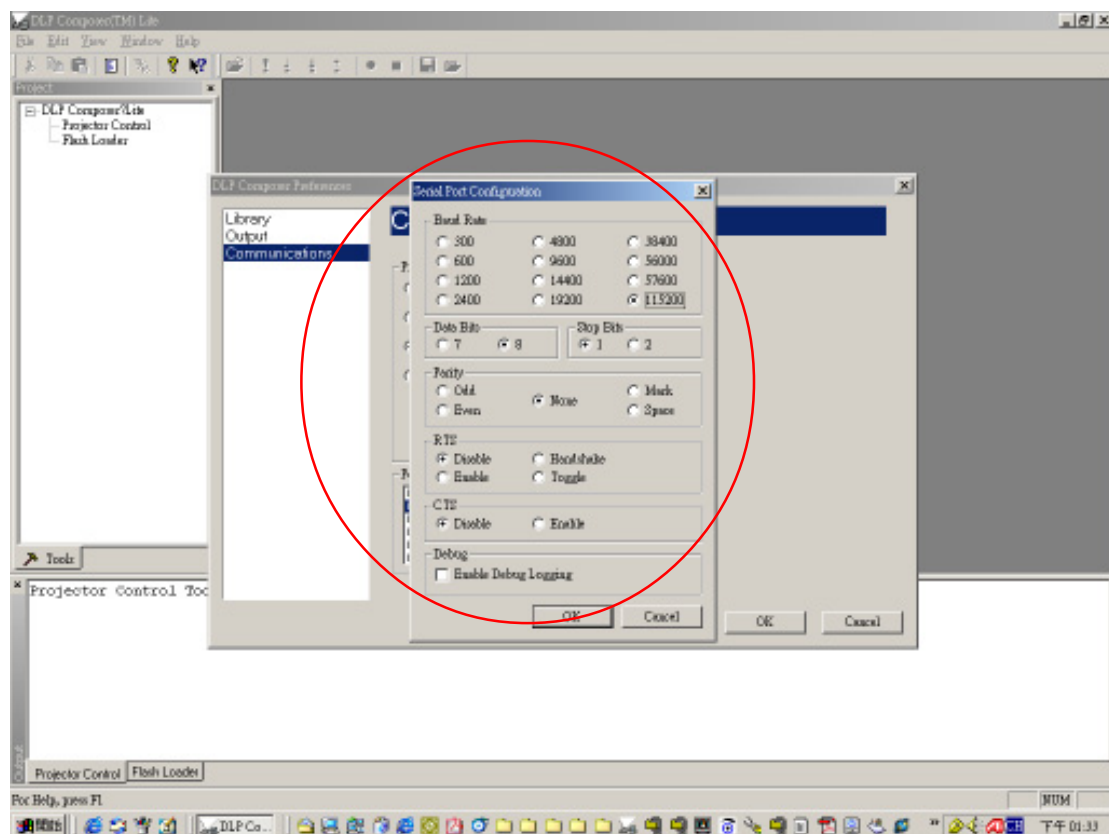

4. Choose “Output”, setting Number of is “2000”.

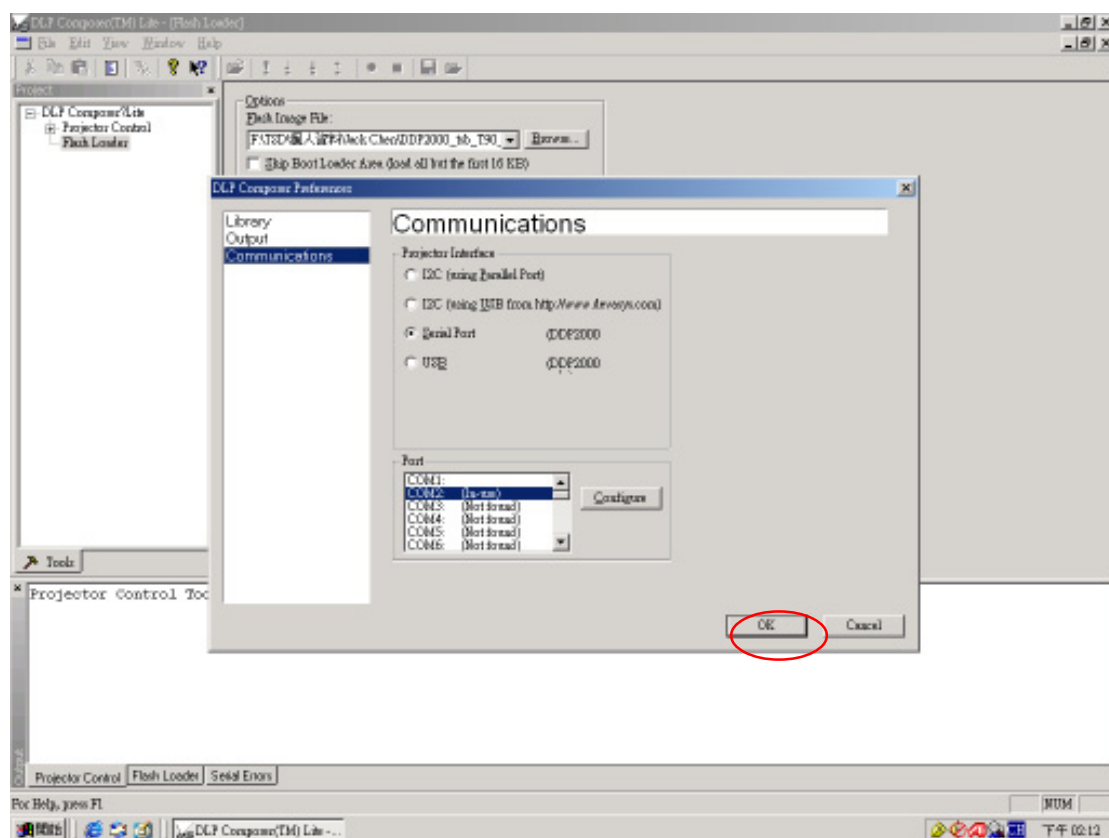

5. Choose “Communications”, setting Port is “COM2” and then press “Configure” button into the next setup procedure.

6. Setup the Baud Rate is “115200”, Data Bits is “8”, Stop Bits is “1”, Parity is “None”, RTS is “Disable” and CTS is “Disable”, then press “OK” button.

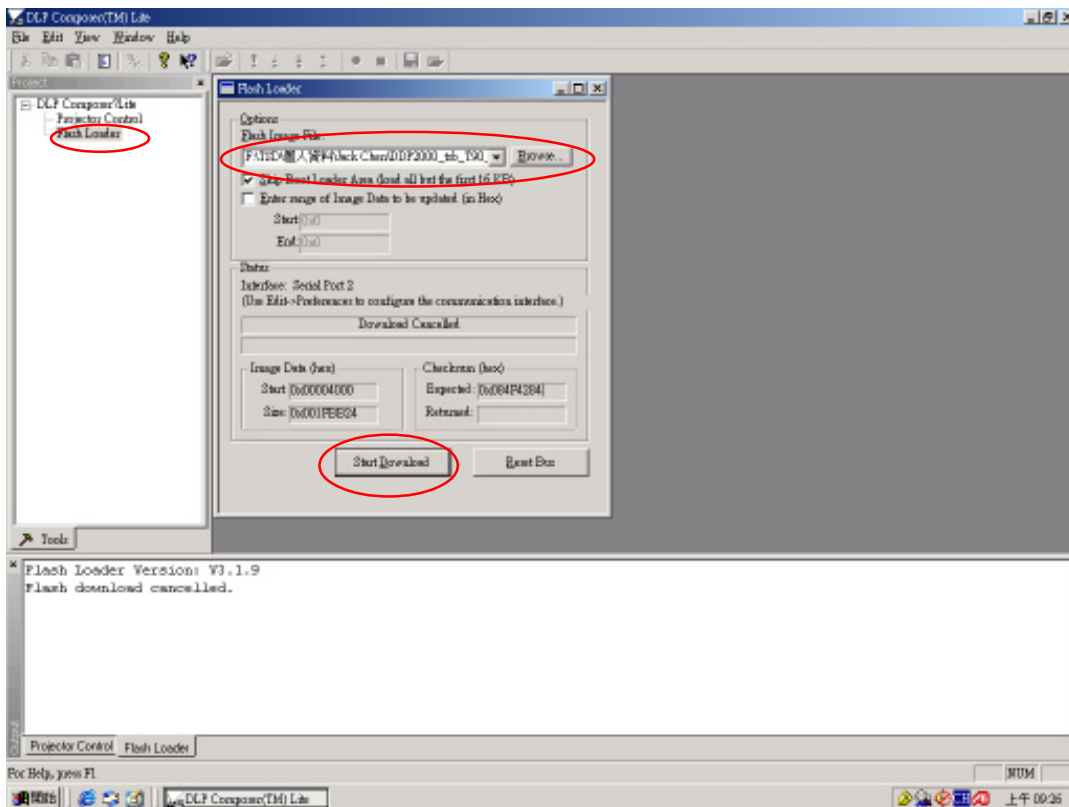

7. Come back to this layer, and then press “OK” button to execute the program.

8. Click “Flash Loader.”

Choose the Firmware upgrade program from Browser.

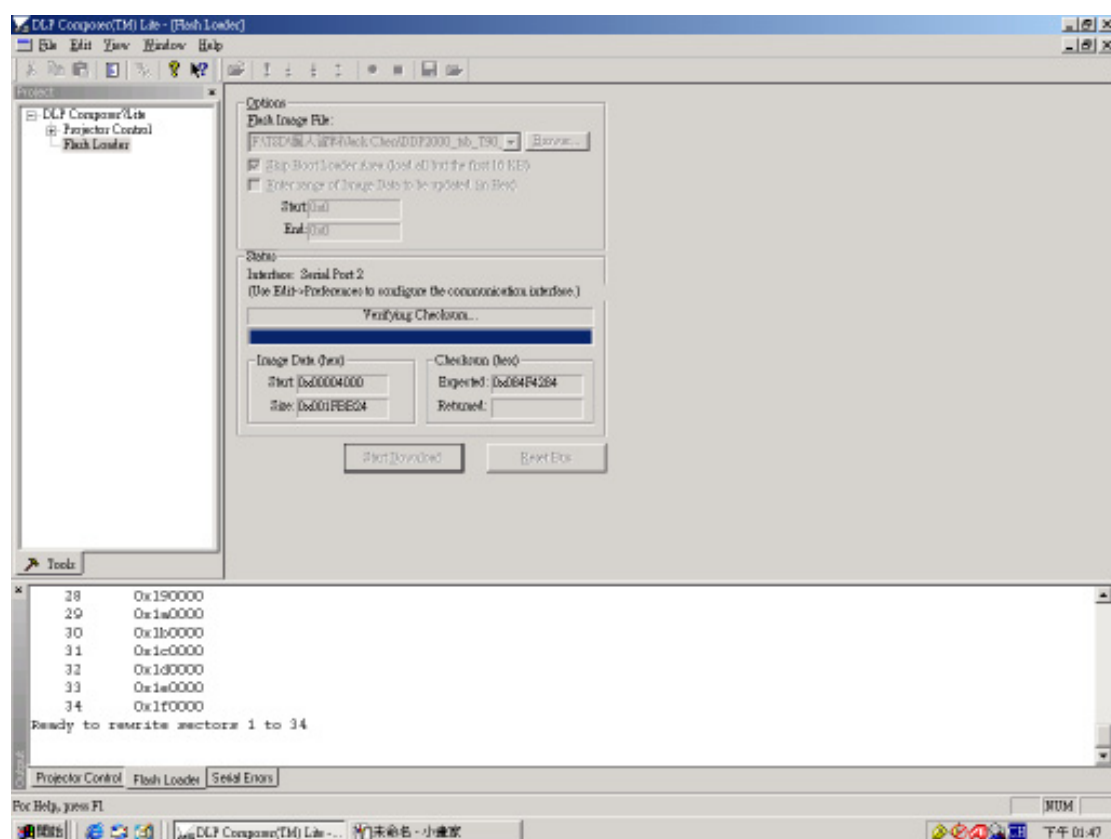

Then press “Start Download” button to execute upgrade program.

9. Press “Yes” button.

10. After the firmware upgrade is complete, power off projector, and then restart it again.

EDID Upgrade Procedure **(For MT200 Only)**

6-1 Equipment Needed

Hardware :

- Power Cord
- DVI To DFP Cable
- RS-232 Cable
- MT200 Projector
- Fixture for MT200

Software :

- EDID.exe
- MT_200_EDID.ini

Environment :

- Windows 98 / 2000 / XP

6-2 Setup Procedure

1. Connect DVI-DFP Cable to MT200.
2. Connect RS-232 of Fixture to COM1 of PC. (Can be connected to COM1 or COM2)
3. Connect Power of Fixture.

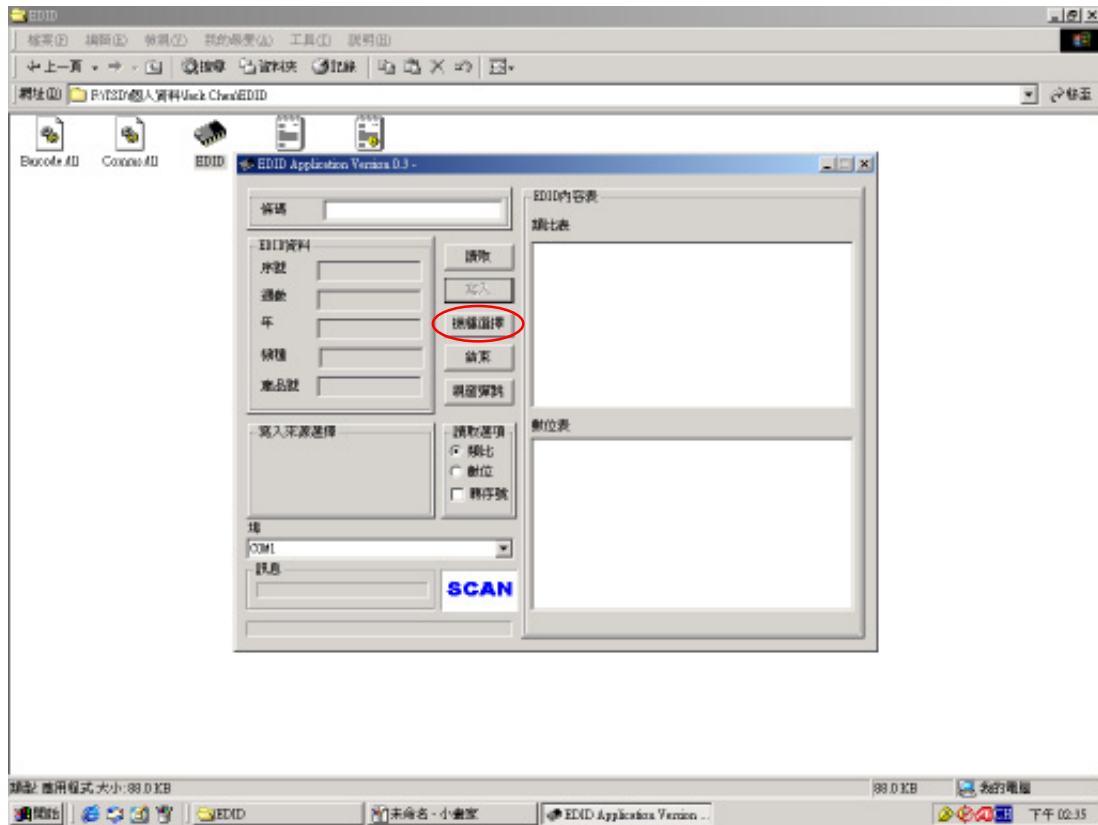

6-3 EDID Upgrade Procedure

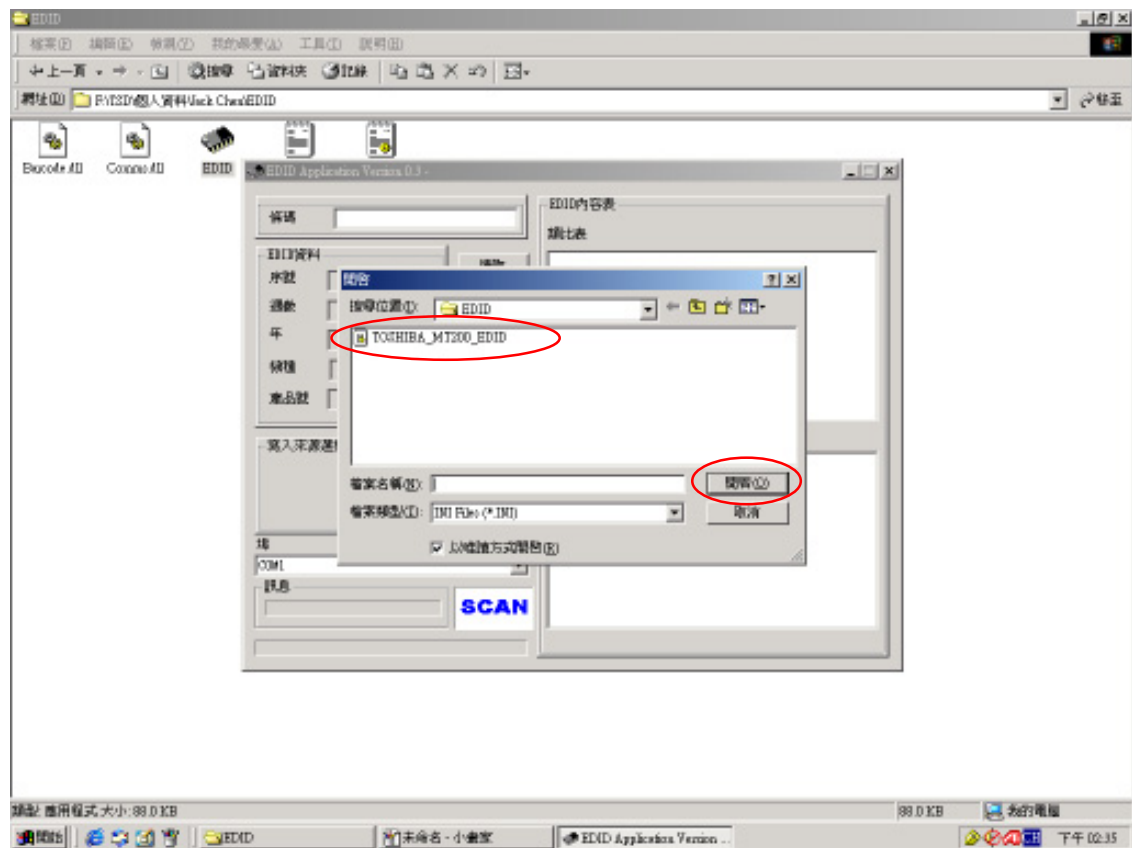

1. Execute "EDID" icon.

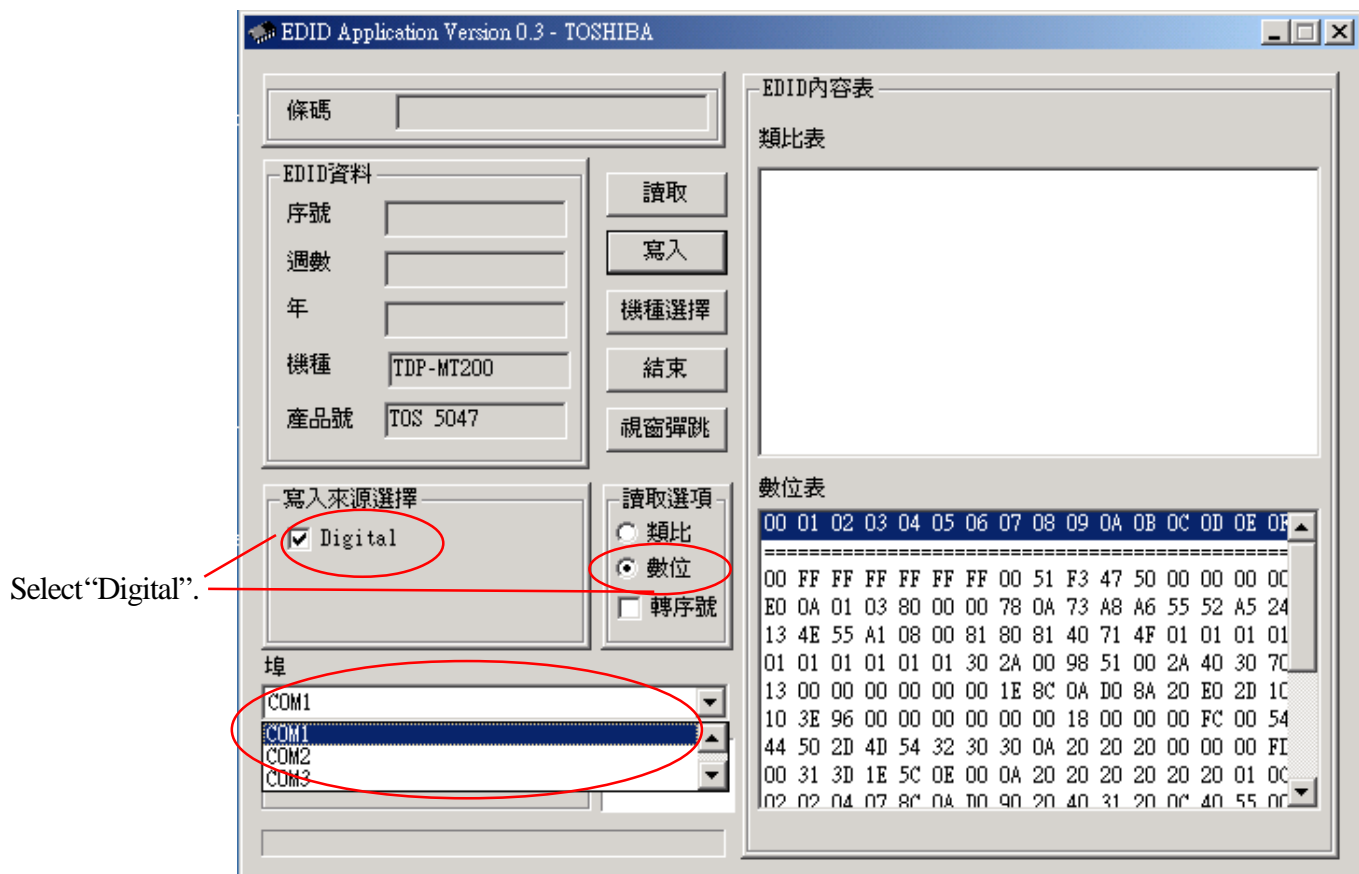

2. Press “Model” icon.

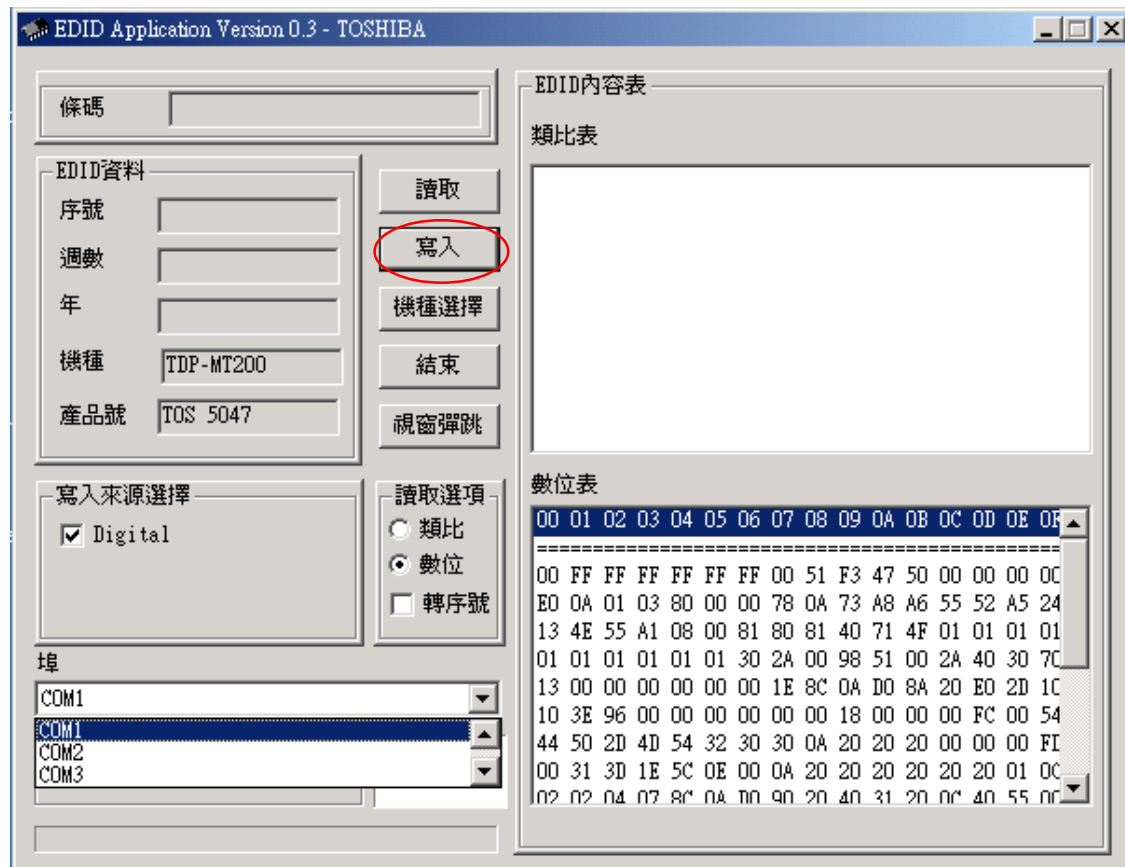

3. Choose the “MT_200_EDID.ini” file then press “open” icon.

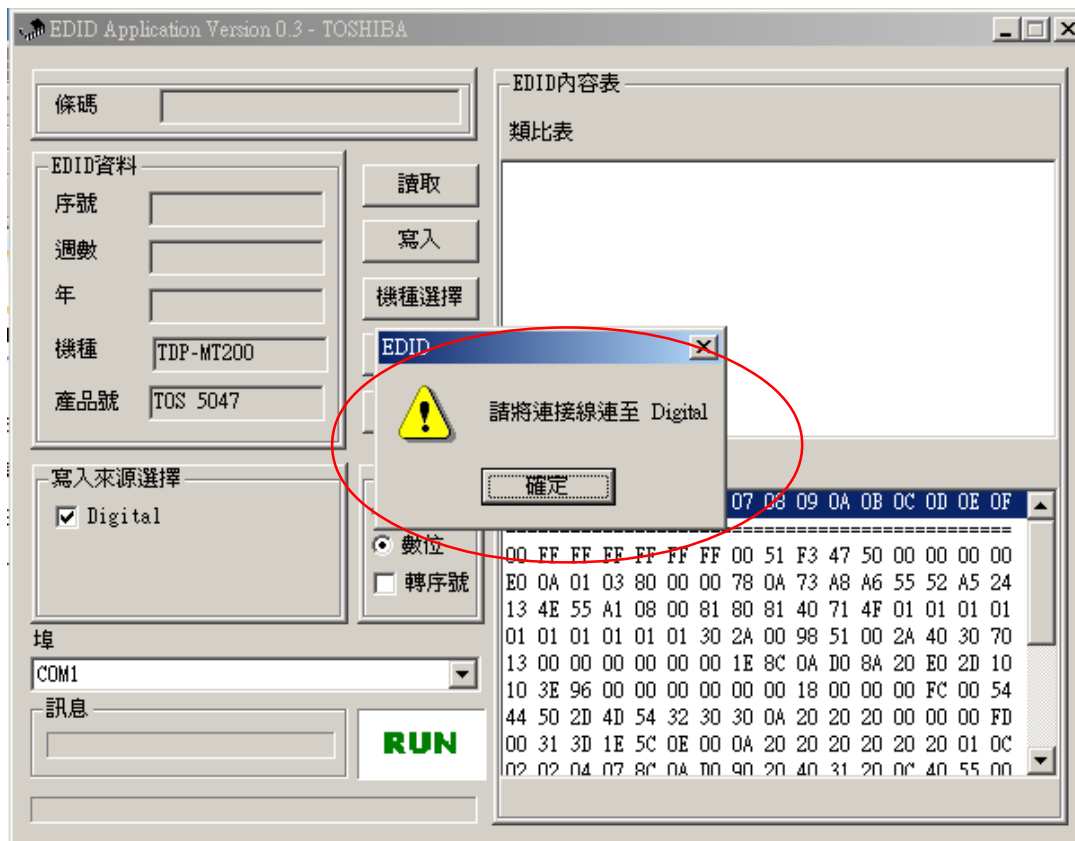

- Press Port setting button. Setting the right COM Port.

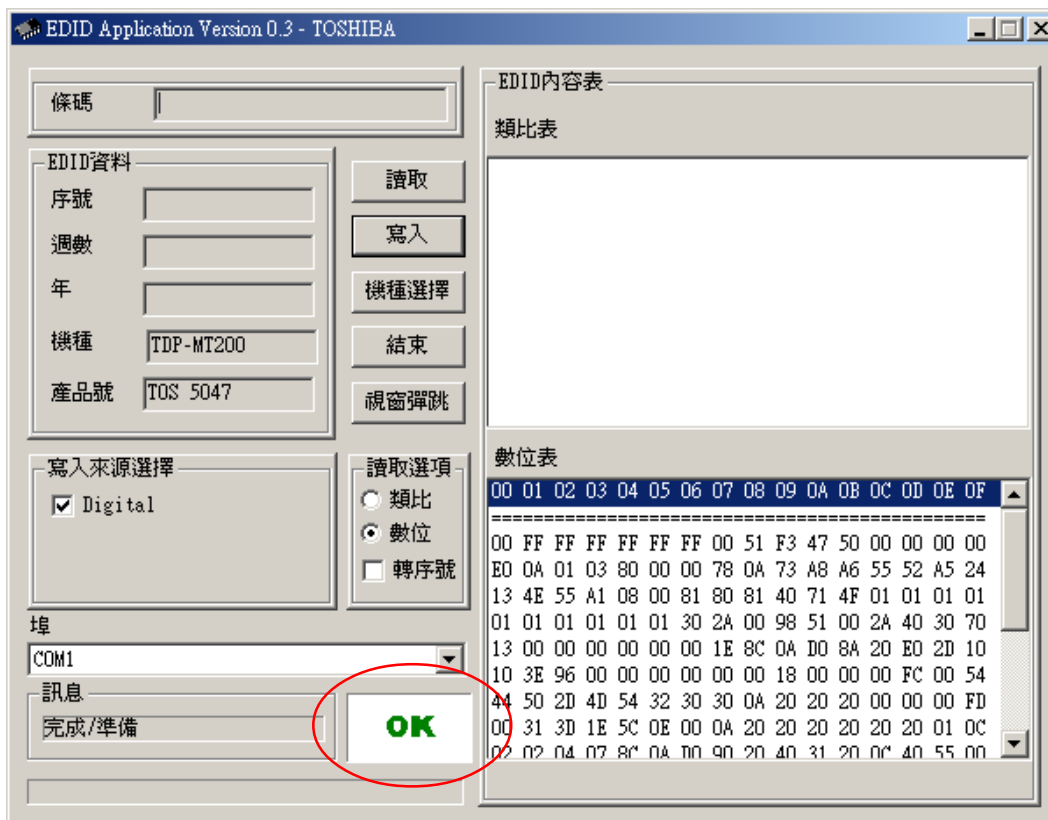

- Press "Write" icon.

6. The message will shown on the screen.

7. "OK" means the EDID upgrade is complete.

8. Check if EDID is ok, press “Read” button and then the data will show up as step 2 shows.

Exploded View and Replacement Parts List

Packing Assembly

TDP-T80/T90/T91/TW90

CAUTION:

The international hazard symbols “” in the schematic diagram and the parts list designate components which have special characteristics important for safety and should be replaced only with types identical to those in the original circuit or specified in the parts list. The mounting position of replacements is to be identical with originals. Before replacing any of these components, read carefully the PRODUCT SAFETY NOTICE.

Do not degrade the safety of the receiver through improper servicing

NOTICE:

- The parts number must be used when ordering parts, in order to assist in processing, be sure to include the Model number and Description.
- The P.C. board assembly with * mark is no longer available after the end of the production.
